

Motorola MPX200

The Motorola MPx200 combines the power of the desktop with Windows Mobile™ and the “always at hand” convenience and quality of the Motorola mobile phone to make life simpler, smarter and more synchronized for the mobile professional.

Let's Do Lunch

Never double book again. Stay in total control of your professional and personal life by synchronizing your Windows centric world with your mobile phone via a USB connection, infrared technology or, if your enterprise Exchange server is equipped with MIS2000 or later (Exchange 2003, for example), you can update your email, contacts and calendar over the air (over a GPRS connection provided by the operator).¹ The Motorola MPx200 allows full Personal Information Management (PIM) functionality through Microsoft Outlook® that enables you to view and interact with your inbox, contacts, calendar and tasks at the touch of a button.

Digital Networking

Keep in constant contact with the movers and shakers in your professional and private life. Need to surf, shop or trade information on the Internet? Web browsing is a snap with the Motorola MPx200's indispensable Pocket Internet Explorer application.¹

Lights, Camera, Action!

Need to show your latest music video or trailer to an agent or a hot Hollywood star? Take your show on the road with the Motorola MPx200 where you have the ability to view streaming video through the power of Packet Video. You can also listen to WMA (WindowsMedia file) and MP3 music files with the popular Windows Media Player application and the phone's rich polyphonic speaker.

Do I Know You From Somewhere?

With lots of places to go and people to see, a face will never be forgotten with Motorola MPx200's advanced camera accessory that supports a video/photo album and photo caller ID¹ functionality complete with a slide show option. Now you will be able to connect a face to a name at a moment's notice.

Fun Times Ahead

You might be a professional, but that doesn't mean you need to stop indulging your inner child. With amazing downloading¹ capabilities, you can customize your Motorola MPx200 to create the gaming device of your dreams. And, with superior messaging capabilities, you can send amusing notes with animations, photos and more to friends, colleagues and family during downtime.

For more information regarding product availability and MSRP, please check with your local Motorola representative.

¹Network, subscription and SIM card or service provider dependent feature. Not available in all areas.
