

RAZR² V9

The sleeker, smarter, stronger RAZR² V9 is an exciting evolution of the RAZR™ brand. With mesmerizing appearance and a new, richer multimedia experience, RAZR² V9 is the ultimate stylish feature phone.

Sleek and Chic

The RAZR² V9 defines the next trend in 3G. Its stainless steel frame make this svelte handset durable and resilient – helping to ensure an ultra-thin shape with a strong structure. Its composing materials include vacuum metal finishes and two-tone soft touch housing that will inspire unending envy. At 2.0”, the RAZR² V9 boasts the largest external screen in its class, enabling its owners to play music via touch-sensitive music keys, without ever opening the phone.

See What I See

Consumers can share their video instantaneously with the revolutionary “See What I See” capability, where users can stream live video footage to another wireless customer while a call is in progress¹. And owners can watch the video on the RAZR² V9’s large internal screen with twice the resolution of the original RAZR. Consumers can also get the best shot with a 2.0 megapixel camera with 8x digital zoom.

Stand Out in a Crowd

With its fabulous good looks and incredibly innovative CrystalTalk™ technology – automatically accounting for background noise and adjusting the audio to match the ambient volume – consumers will be heard in a crowd. HSDPA 3.6 Mbps technology helps connect users to the Internet at broadband-like speeds¹, like DSL in your pocket. RAZR² V9’s integrated digital music player supports a wide variety of audio formats, so consumers can bring the party wherever they go.
