

ROKR E8

From talk to music in one touch, ROKR E8 features cutting-edge, easy-to-use controls that allow a smooth transition from phone to MP3 player to imaging device.

Transforming the Music Experience

Motorola designed ROKR E8 to deliver an uncompromised consumer experience for music or talk. Using breakthrough ModeShift technology from Motorola, the quad-band GPRS/EDGE device presents users with only the controls they need, at the time they need them, instantly transforming from music player to phone to imaging device with the touch of a button. Simply move a thumb across the FastScroll navigation wheel to search for music (music mode), contacts (phone mode), calendar (phone mode) and multimedia (imaging mode). A perfect blend of art and science, the face of the E8 is a sleek, seamless panel that features the first haptic touch pad from Motorola, which provides vibrating, tactile feedback when the user touches virtual buttons.

Liberate Your Music Library

ROKR E8 is designed for music. The device enables the ultimate freedom in loading songs from multiple sources and is compatible with standard connectors, software and accessories. Compatibility with Windows™ Media Player™ 11 on the PC allows users to easily transfer their favorite music onto the device, access to more than 200 online music stores and simple drag-and-drop organizing of songs, artists, albums and playlists. Discovering and downloading new music has never been easier with the ROKR E8's built-in FM radio (optional 3.5mm headphones must be plugged in) and the Song ID feature that recognizes and displays tune information². Share music with friends over the built-in speaker, break free from wires with stereo Bluetooth® wireless technology³, or use a favorite set of standard stereo wired headphones using the 3.5 mm headset jack.

ROKR E8	
Dimensions	115x53x10.6mm
Band	Quad Band; GPRS/EDGE class 12

Certain mobile phone features are dependent on the capabilities and settings of your service provider's network. Additionally, certain features may not be activated by your service provider, and/or their network settings may limit the feature's functionality. Always contact your service provider about feature availability and functionality. All features, functionality and other product specifications are based upon the latest available information and are believed to be accurate; however such product specifications are subject to change without notice or obligation.

¹ The unauthorized copying of copyrighted materials is contrary to the provisions of the Copyright Laws of the United States and other countries. This device is intended solely for copying non-copyrighted materials, materials in which you own the copyright, or materials which you are authorized or legally permitted to copy. If you are uncertain about your right to copy any material, please contact your legal advisor.

²Network and or SIM card dependent feature, not available in all areas. Airtime, data charges, and/or additional charges may apply.

³ This device supports Bluetooth A2DP and AVRCP profiles. In order for Bluetooth devices to communicate with one another, they must utilize the same Bluetooth profile. To determine the profiles supported by other Motorola devices, visit www.hellomoto.com/bluetooth. For other devices, contact their respective manufacturer.

Certain Bluetooth features including those listed may not be supported by all compatible Bluetooth-enabled devices, and/or the functionality of such features may be limited in certain devices, or by certain wireless carriers. Contact your wireless carrier about feature availability and functionality.

⁴Available user memory varies due to the configuration of the phone, which varies by service provider.
