

MOTOROLA V260

A mobile life made simple – the Motorola V260 delivers the features you want with style and affordability. Thanks to exterior convertible covers and downloadable games, screensavers and MP3 ringtones, it is easy to make this mobile one-of-a-kind. Arming you with the tools to take story telling to the next level, the model V260 delivers Multi-media Messaging Service (MMS), letting you add icons, ringtones and wallpaper to traditional text messages – now you can tell a story with words, sounds *and* graphics! And to satisfy both your fun and functional needs, the Motorola V260 delivers directions via GPS technology to keep you on track while on-the-go. Smart, small and affordable, mobile marvel is impossible to resist.

Baby, I Got It

No two people are *exactly* alike. So why should your mobile be exactly the same as the next person's? With BREW technology, you have the power to add new games, screensavers, wallpapers and MP3 ringtones – so you can download and switch up your mobile to showcase your true colors. And with a 5-way navigation key, maneuvering through downloads is quick and easy.

Go Ahead, I'm Listening

Recording someone's name in order to voice dial is a thing of the past. The Motorola V260's speaker independent voice dial feature let's you simply say the name of a contact in the phonebook, and the phone is smart enough to match the name you speak. It even gives you prompts to connect to the recipient's mobile, home or work number.

Messaging Mayhem

When words just aren't enough, let music or pictures do the talking for you. With MMS, the model V260 gives extra emphasis to your thoughts by letting you attach wallpaper, icons and ringtones to regular text messages.

Directions for Dummies

The Motorola V260's BREW technology lets you download savvy applications to your phone that make you smart and life simple. Equipped with capabilities for location based services, this know-it-all mobile lets you retrieve live step-by-step driving instructions by simply downloading a GPS application. Thanks to this helpful application, you never have to worry about losing your way (or your cool) in a strange place.
