MOTOROLA

MOTOROLA V360

Balancing advanced functionality and affordability, the Motorola V360 defies expectations by addressing imaging and connectivity needs, as well as your budget. This pocketable mobile features SCREEN3, an innovative technology solution from Motorola that gives you zero-click access[1] to news, sports, entertainment, and other premium content directly from your mobile device home screen – no buttons to push, no browsers to launch. Motorola's SCREEN3 puts fresh content at your fingertips[1]. And, with video capture and playback, an integrated VGA camera, Push-To-Talk over cellular (PoC)[2] functionality, Bluetooth® wireless connectivity[1], an MP3 player and optional TransFlash™ expandable memory, this classic clamshell proves it's possible to have it all.

Use Your Eyes & Ears

Housed in a slim flip-phone design, the model V360 lets you capture still shots via an integrated VGA camera and moving images with the video capture and playback feature, so you'll never lose the memory of a great moment. An integrated MP3 player promises that you'll always have the tools to groove, while an optional TransFlash memory card accessory ensures ample room to store your favorite multimedia files.

Good Connections

Connect with one person or an entire group on the spot using the dedicated PoC[2] button to chat walkie-talkie style or the integrated speakerphone. Holding conference calls on-the-fly couldn't be easier. And to make sure all parts of your world are in sync, Bluetooth wireless technology lets you talk hands-free on your long commute using any compatible Bluetooth enabled headset or car kit.

You Got the EDGE

EDGE technology makes it painless to access the Internet in a flash, download multimedia files and share video with lightening speed[1]. Now it's a breeze to check out the latest news, sports and weather or to catch up on email at your leisure – whether away from home or the office.
