SAFETY INFORMATION

Cautions and Warnings

Electrostatic Discharge

The phone components may be damaged by electrostatic discharge (ESD). Always use an ESD mat and ground strap when working with internal components.

Battery Safety Guidelines

Handle Battery with care. Ensure Battery edges and surfaces are not dented or deformed. If the Battery Pack is dropped to the floor, it may be internally damaged and must be scrapped.

Ensure all surfaces, fixtures, and phone components contacting the Battery are smooth and clean.

- Ensure Battery and its insulation are not damaged (e.g. scratched, dented, punctured) prior to and throughout assembly.
- Prior to assembly, ensure Battery edges and surfaces are not dented or deformed, and that fixtures and parts that will contact the Battery are free of foreign material.
- Ensure screws and screwdrivers do not contact the Battery.
- Failure to adhere to Safety Critical Note(s) may increase risk of rupture, burning, or failure to function safely when used by the customer.

PSCD Gaps

All dimensions are in millimeters (mm). The following gaps are considered maximum allowable without further approval from a supervisor. Measure gaps at an angle perpendicular to the surface/area being measured. Feeler Gauges must not be used at an angle as they will give false-positive results.

DISASSEMBLY AND RECOVERY

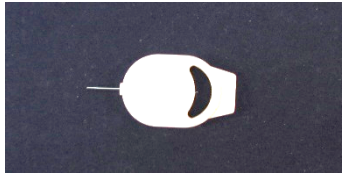

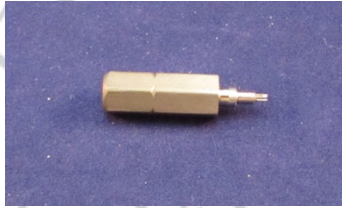

Disassembly and Recovery Map

*Shaded parts may be eligible for parts recovery.

Tools Required for Disassembly

The following tools are required to disassemble the DROID MAXX 2 / Moto X Play phone.

<i>Description</i>	<i>Part #</i>	<i>Picture / Drawing</i>
SIM Tray Removal Tool	4-00-U2-10000	
Blackstick	--	
3IP Torx Bit	--	
Thin Plastic Spudger	0-00-00-40826	
Tweezers (Plastic or Plastic-Tipped)	--	--
Tweezers (Metal)	--	--
ESD Mat and Wrist Strap	--	--
Gloves or Finger Collets	--	--
Isopropyl (ISP) Alcohol	--	--

SIM/SD Tray Removal

NOTE

The SIM/SD Tray can be recovered and reused after removal.

1. Insert the SIM Tray Removal Tool into the SIM/SD Tray hole.
2. Push the SIM Tray Removal Tool into the SIM/SD Tray hole until the SIM/SD Tray ejects from the phone. The white dot is visible when the SIM/SD Tray retaining clips have released.
3. Remove the SIM/SD Tray from the phone.

Water Detection Label Inspection

Inspect the Water Detection Label (WDL) visible through the SIM/SD Tray slot.

Rear Cover Removal

NOTE

The Rear Cover can be recovered and reused after removal.

1. Starting at the cutout near the USB Connector, use a fingernail to release the Rear Cover snaps on the USB Connector side of the phone.

2. Lift the Rear Cover away from the Rear Housing to disengage the remaining snaps.

Rear Housing Removal

NOTE

The Rear Housing can be recovered and reused after removal.

1. Remove the 17 3IP Screws from the Rear Housing.

2. Lift the Rear Housing from the phone.

NOTE

The Side Keys will fall out when the Rear Housing is removed from the phone.

3. Use the Thin Plastic Spudger to disconnect the NFC Antenna.

4. Use the Plastic Tweezers to disconnect the Battery.

Front-Facing Imager Removal

NOTE

The Front-Facing Imager can be recovered and reused after removal.

1. Lift the Front-Facing Imager out of the pocket of the Display.

2. Use the Plastic Tweezers to remove the Kapton Tape from the Front-Facing Imager ZIF Connector.

NOTE

After you remove the Kapton Tape, you cannot reuse it.

3. Use the tip of the Plastic Tweezers to open the Front-Facing Imager ZIF Connector door.
4. Remove the Front-Facing Imager from the connector.

Front-Facing Imager Gasket Removal

Use the Plastic Tweezers to remove the Front-Facing Imager Gasket from the pocket of the Display.

NOTE

After you remove the Front-Facing Imager Gasket, you cannot reuse it.

Earpiece Speaker Removal

Use the Thin Plastic Spudger to pry the Earpiece Speaker out of the pocket of the Display.

NOTE

After you remove the Earpiece Speaker, you cannot reuse it.

Main-Microphone Grommet Removal

Use the Tweezers to remove the Main-Microphone Grommet from the PCB.

NOTE

After you remove the Main-Microphone Grommet, you cannot reuse it.

Loudspeaker Removal

Use the flat end of the Blackstick to pry the Loudspeaker from the PCB at the location shown.

NOTE

After you remove the Loudspeaker, you cannot reuse it.

Battery Removal

/// WARNING ///

Failure to adhere to Safety Critical Note(s) may increase risk of rupture, burning, or failure to function safely when used by the customer. Refer to the Battery Safety Guidelines.

// CAUTION //

Handle the Battery Pack with care. If dropped to the floor, it may be internally damaged and must be scrapped.

Ensure Battery and its insulation are not damaged (e.g. scratched, dented, punctured) prior to and throughout assembly.

Prior to assembly, ensure Battery edges and surfaces are not dented or deformed, and that fixtures and parts that will contact the Battery are free of foreign material.

Ensure screws and screwdrivers do not contact the Battery.

NOTE

The Battery can be recovered and reused after removal.

1. Insert the Thin Plastic Spudger between the Battery and PCB Shields at location shown.

// CAUTION //

Do not insert the Thin Plastic Spudger near the Key Flex.

- Slide the Thin Plastic Spudger to the right and up the length of the Battery to separate the Battery Adhesive from the PCB Shields.

// CAUTION //

Do not damage the Battery flex tail or the NFC Antenna flex tail.

- After the Battery Adhesive is separated from the PCB Shields, lift the Battery from the PCB. Lift the side of the Battery opposite the Side Keys.
- If the Battery Adhesive remains attached, use the Battery Pull Tab to aid in separating the Battery from the PCB.

Rear-Facing Imager Removal

NOTE

The Rear-Facing Imager can be recovered and reused after removal.

1. Use the Tweezers to remove the Kapton Tape from the Rear-Facing Imager ZIF Connector.

NOTE

After you remove the Kapton Tape, you cannot reuse it.

2. Use the flat end of the Blackstick to open the Rear-Facing Imager ZIF Connector door.
3. Remove the Rear-Facing Imager from the connector.

Side-Key Flex Removal

1. Use the Tweezers to remove the Kapton Tape from the Side-Key Flex ZIF Connector door.

NOTE

After you remove the Kapton Tape, you cannot reuse it.

2. Use the flat end of the Blackstick to open the Side-Key Flex ZIF Connector door.

3. Use the flat end of the Blackstick to disengage the Side-Key Flex clips. Use the Blackstick to lift the clips up and off of the rail on the Display.

NOTE

After you remove the Side-Key Flex, you cannot reuse it.

4. Lift the Side-Key Flex from the rail on the Display.

PCB Removal

NOTE

The PCB can be recovered and reused after removal.

1. Remove the Kapton Tape from the Display Flex ZIF Connector.

NOTE

After you remove the Kapton Tape, you cannot reuse it.

2. Use the flat end of the Blackstick to open the Display Flex ZIF Connector Door.
3. Push the Blackstick against the ledge on the Display Flex to remove the flex from the Display Flex ZIF Connector.
4. Slide the Thin Plastic Spudger between the PCB and Display at the location shown. Slide the Thin Plastic Spudger in the same direction as the arrow points in the highlighted area.

// CAUTION //

Slide the Thin Plastic Spudger only in the same direction as the arrows in the highlighted areas. Damage to the PCB Grounding Pins may occur if the Thin Plastic Spudger slides in the opposite direction.

- Slide the Thin Plastic Spudger between the PCB and Display at the location shown. Slide the Thin Plastic Spudger in the same direction as the arrow points in the highlighted area.

// CAUTION //

Slide the Thin Plastic Spudger only in the same direction as the arrows in the highlighted areas. Damage to the PCB Grounding Pins may occur if the Thin Plastic Spudger slides in the opposite direction.

- Slide the Thin Plastic Spudger between the PCB and Display at the location shown. Slide the Thin Plastic Spudger in the same direction as the arrow points in the highlighted area.

// CAUTION //

Slide the Thin Plastic Spudger only in the same direction as the arrows in the highlighted areas. Damage to the PCB Grounding Pins may occur if the Thin Plastic Spudger slides in the opposite direction.

- Slide the Thin Plastic Spudger between the PCB and Display at the location shown. Slide the Thin Plastic Spudger in the same direction as the arrow points in the highlighted area.

// CAUTION //

Slide the Thin Plastic Spudger only in the same direction as the arrows in the highlighted areas. Damage to the PCB Grounding Pins may occur if the Thin Plastic Spudger slides in the opposite direction.

8. After the PCB Adhesives are separated, lift the PCB from the Display.

Proximity Grommet Removal

Use the Tweezers to remove the Proximity Grommet from the PCB.

NOTE

After you remove the Proximity Grommet, you cannot reuse it.

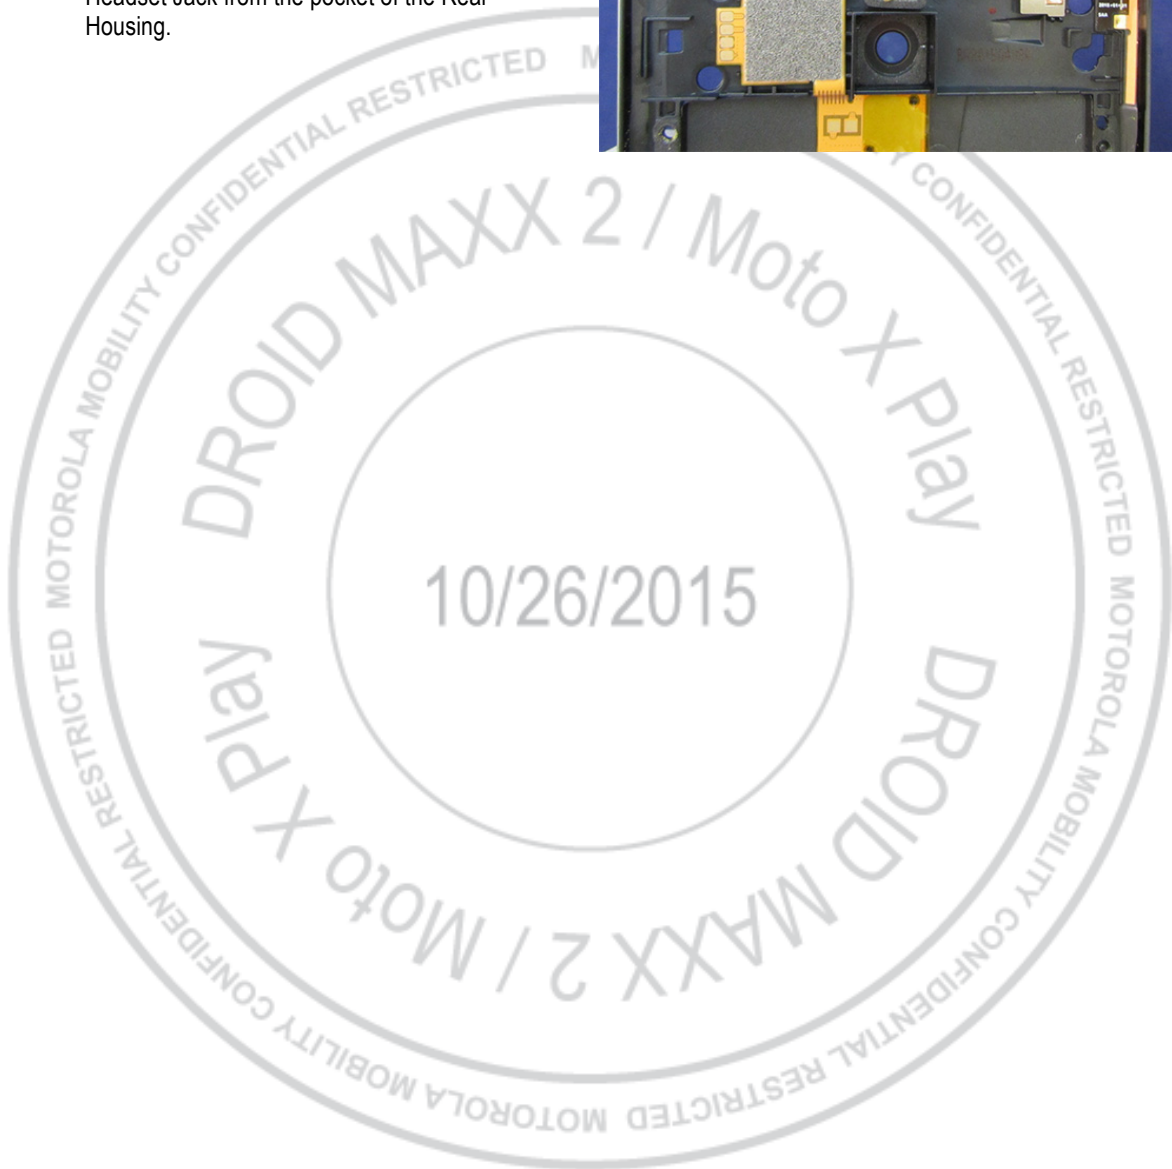

Headset Jack Removal

NOTE

The Headset Jack and Headset Jack Gasket can be recovered and reused after removal.

Use the pointed end of the Blackstick to pry the Headset Jack from the pocket of the Rear Housing.

Secondary-Microphone Grommet Removal

Use the Tweezers to remove the Secondary-Microphone Grommet from the Rear Housing.

NOTE

After you remove the Secondary-Microphone Grommet, you cannot reuse it.

LED Flash Removal

NOTE

The LED Flash can be recovered and reused after removal.

1. From the outside of the Rear Housing, use the pointed end of the Blackstick to push the LED Flash out of the Rear Housing.
2. Use the flat end of the Blackstick to pry the LED Flash Flex free from the Rear Housing.
3. Lift the LED Flash from the Rear Housing.

Rear-Facing Imager Bezel Removal

From the inside of the Rear Housing, use the flat end of the Blackstick to push the Rear-Facing Imager Bezel out of the Rear Housing.

NOTE

After you remove the Rear-Facing Imager Bezel, you cannot reuse it.

Rear-Facing Imager Lens Removal

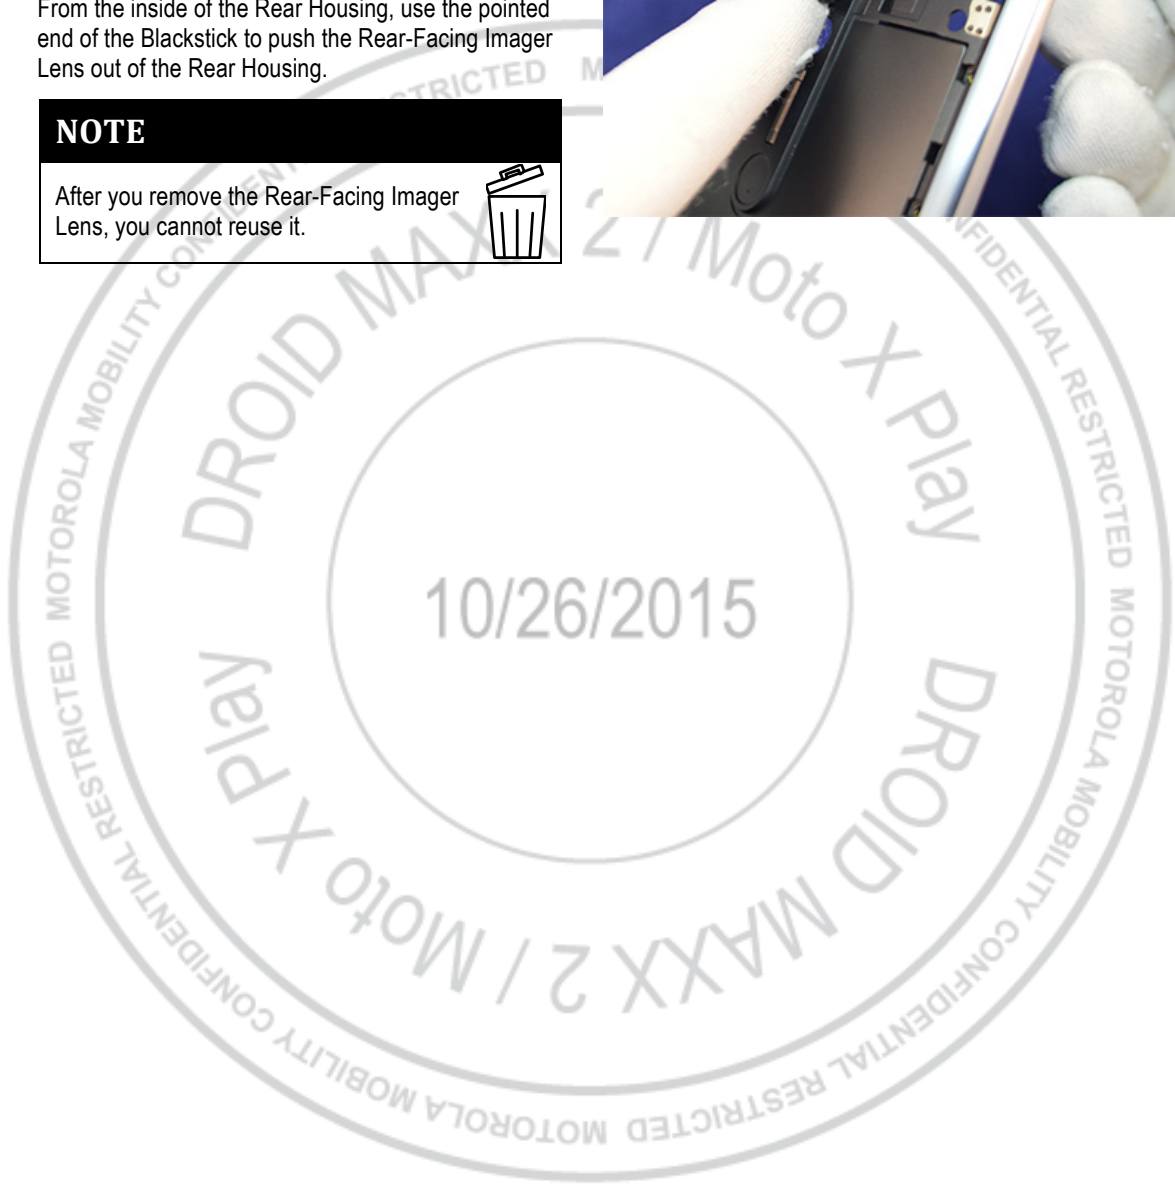

NOTE

The Rear-Facing Imager Deco Ring is attached to the Rear-Facing Imager Lens. The Rear-Facing Imager Deco Ring is removed when the Rear-Facing Imager Lens is removed.

From the inside of the Rear Housing, use the pointed end of the Blackstick to push the Rear-Facing Imager Lens out of the Rear Housing.

NOTE

After you remove the Rear-Facing Imager Lens, you cannot reuse it.

Audio Gasket Removal

Use the Tweezers and ISP Alcohol to remove the Audio Gasket from the Rear Housing.

NOTE

After you remove the Audio Gasket, you cannot reuse it.

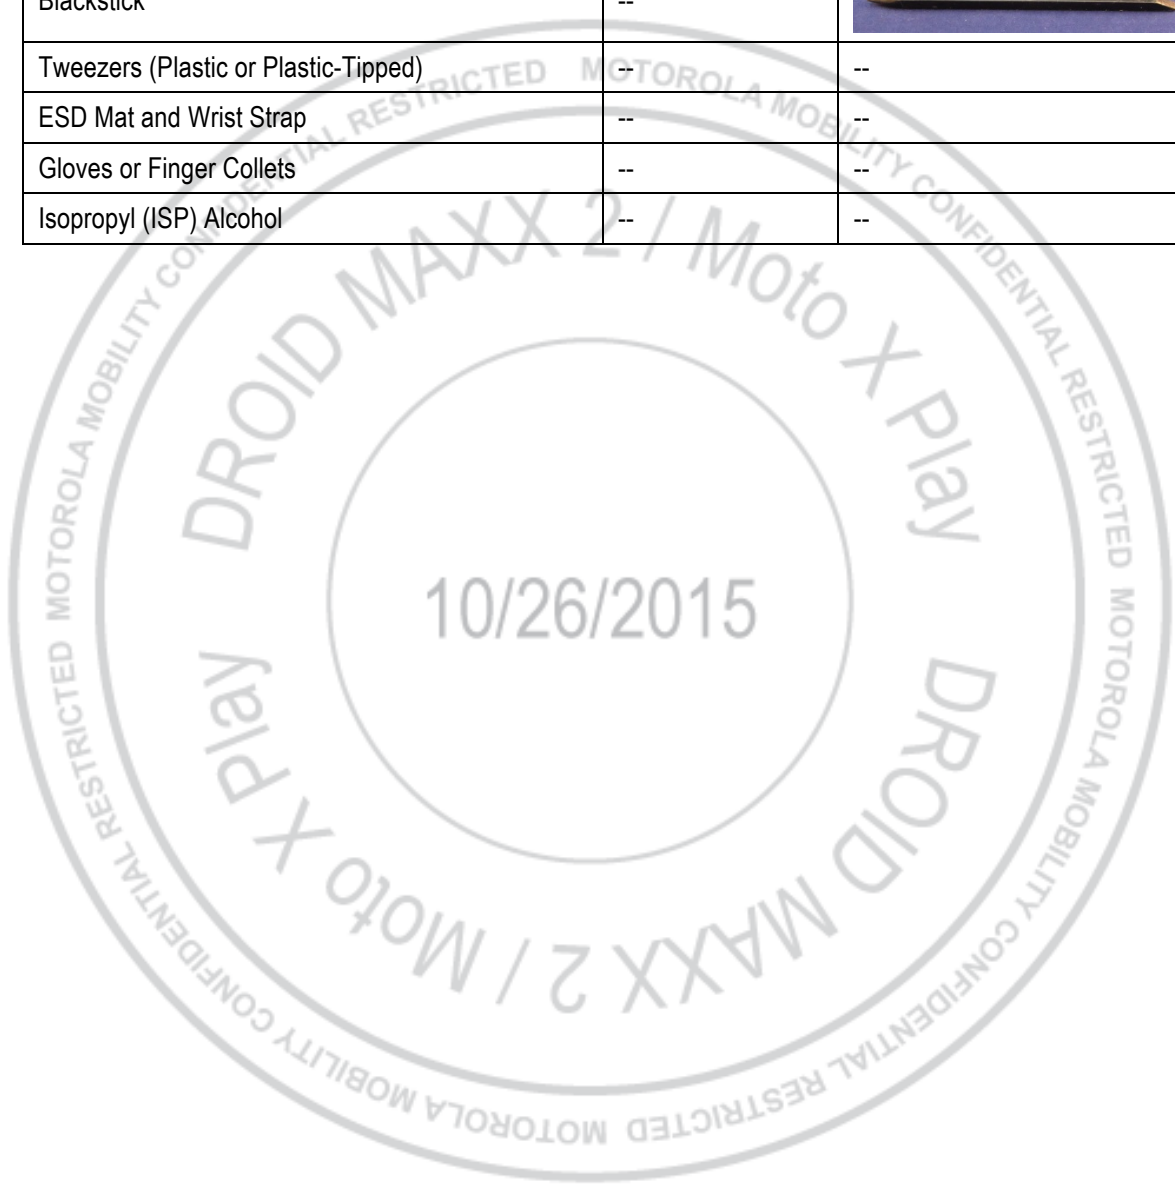

PARTS REFRESH

Tools Required for Parts Refresh

The following tools are required for parts refresh of the Lynx phone.

<i>Description</i>	<i>Part #</i>	<i>Image</i>
Blackstick	--	
Tweezers (Plastic or Plastic-Tipped)	--	--
ESD Mat and Wrist Strap	--	--
Gloves or Finger Collets	--	--
Isopropyl (ISP) Alcohol	--	--

PCB Cleaning

NOTE

Remove the Thermal Spreader only if it is damaged. After you remove it, you cannot reuse it.

1. Use the flat end of the Blackstick to remove the Front Thermal Spreader from the PCB Shields.
2. Use the flat end of the Blackstick and ISP Alcohol to remove all Front Thermal Spreader adhesive from the PCB Shields.
3. Use the Blackstick and ISP Alcohol to remove any remaining adhesive from where the Loudspeaker attaches to the PCB.

NOTE

Remove the Flex Shims only if they are damaged or if thermal work will be performed on the PCB. After you remove them, you cannot reuse them.

4. Use the Tweezers to remove the Flex Shims for the following components:
 - Front-Facing Imager Flex
 - Rear-Facing Imager Flex
 - Side-Key Flex
 - Display Flex

NOTE

Remove the Thermal Spreader only if it is damaged. After you remove it, you cannot reuse it.

5. Use the flat end of the Blackstick to remove the Rear Thermal Spreader from the back of the PCB.
6. Use the flat end of the Blackstick and ISP Alcohol to remove all Rear Thermal Spreader adhesive from the back of the PCB.

7. Verify that the Display-Flex ZIF Connector Door is open.

// CAUTION //

If the ZIF Connector Door is closed, the ZIF Connector may be damaged.

Battery Cleaning

/// WARNING ///

Failure to adhere to Safety Critical Note(s) may increase risk of rupture, burning, or failure to function safely when used by the customer. Refer to the Battery Safety Guidelines.

// CAUTION //

Handle the Battery Pack with care. If dropped to the floor, it may be internally damaged and must be scrapped.

Ensure Battery and its insulation are not damaged (e.g. scratched, dented, punctured) prior to and throughout assembly.

Prior to assembly, ensure Battery edges and surfaces are not dented or deformed, and that fixtures and parts that will contact the Battery are free of foreign material.

Ensure screws and screwdrivers do not contact the Battery.

1. Use the Blackstick and ISP Alcohol to remove any remaining adhesive from the Battery.

// CAUTION //

To prevent damage, do not allow sharp tools or screws to come in contact with the Battery.

2. Use the Blackstick and ISP Alcohol to remove any remaining adhesive from where the NFC Antenna attaches to Battery.

// CAUTION //

To prevent damage, do not allow sharp tools or screws to come in contact with the Battery.

3. Inspect the Battery to verify it is not creased, crushed, or punctured.
4. If the Battery foil pack is wrinkled, slide the flat edge of the Blackstick against the foil pack to smooth out all wrinkles.

10/26/2015

Display Cleaning

// CAUTION //

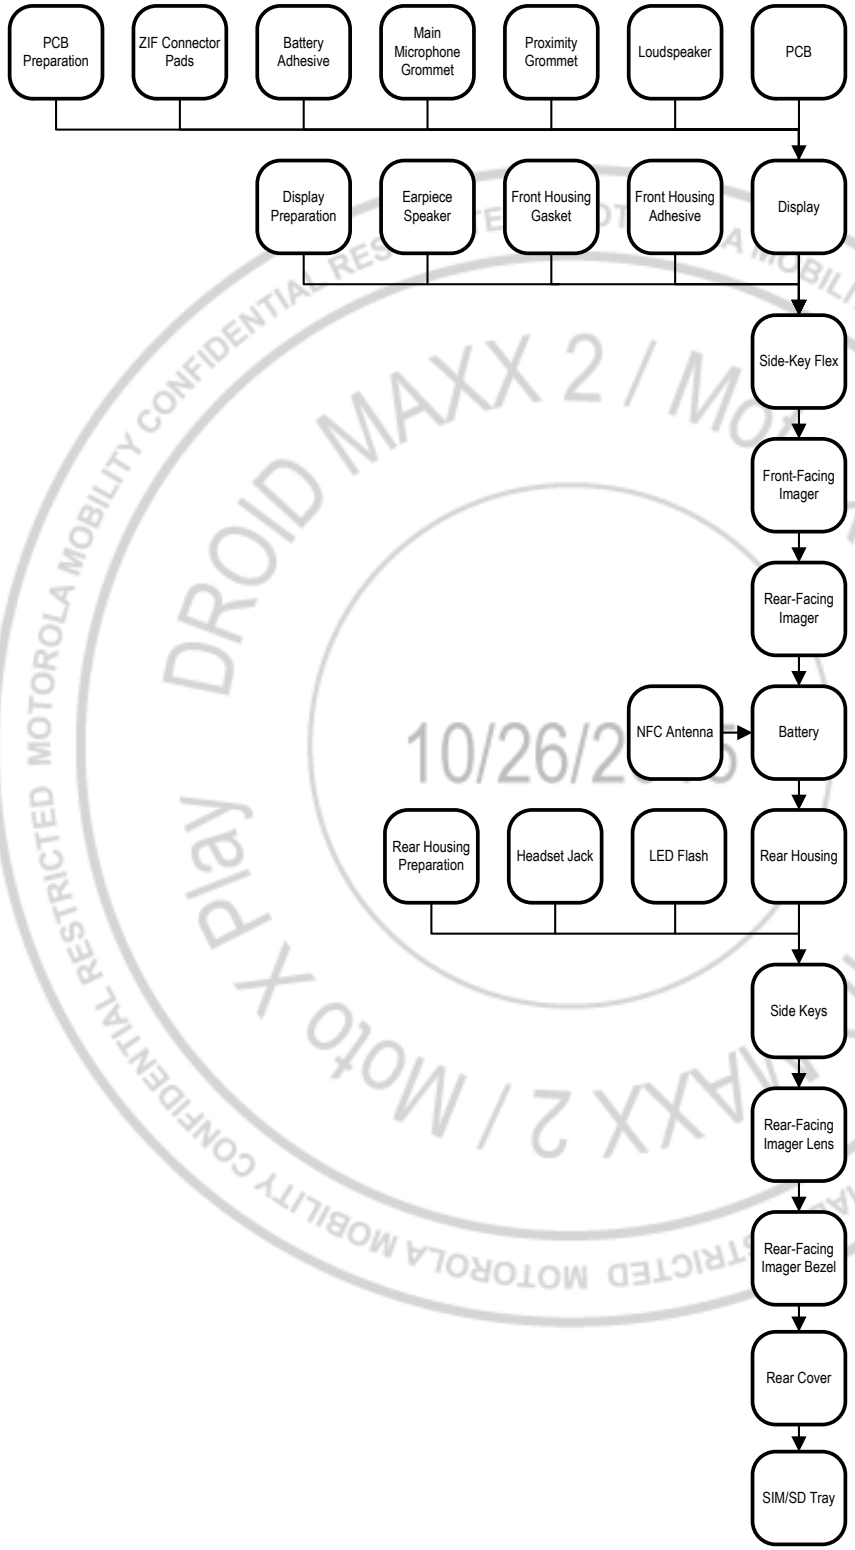

Use care when cleaning the Display. Do not separate the Display from the Lens or damage the Display Flex.

1. Use the Blackstick and ISP Alcohol to remove any remaining adhesive from the Display.
2. Use the Tweezers and ISP Alcohol to remove the following components:
 - Loudspeaker Gasket
 - Notification LED Gasket
 - Tertiary Microphone Mesh
 - Touch Shield Copper Tape
 - LED Shield Copper Tape
3. Inspect the Display Flex to verify it is not torn, creased, or otherwise damaged.

ASSEMBLY

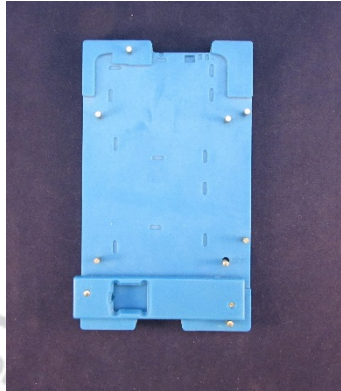

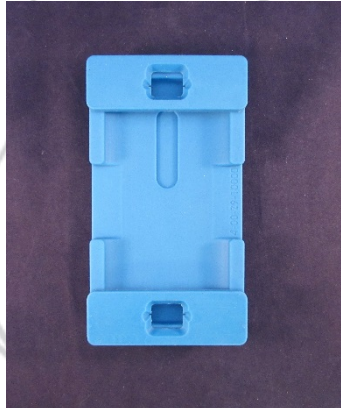

Assembly Map

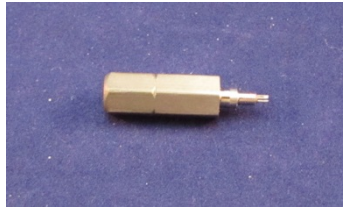

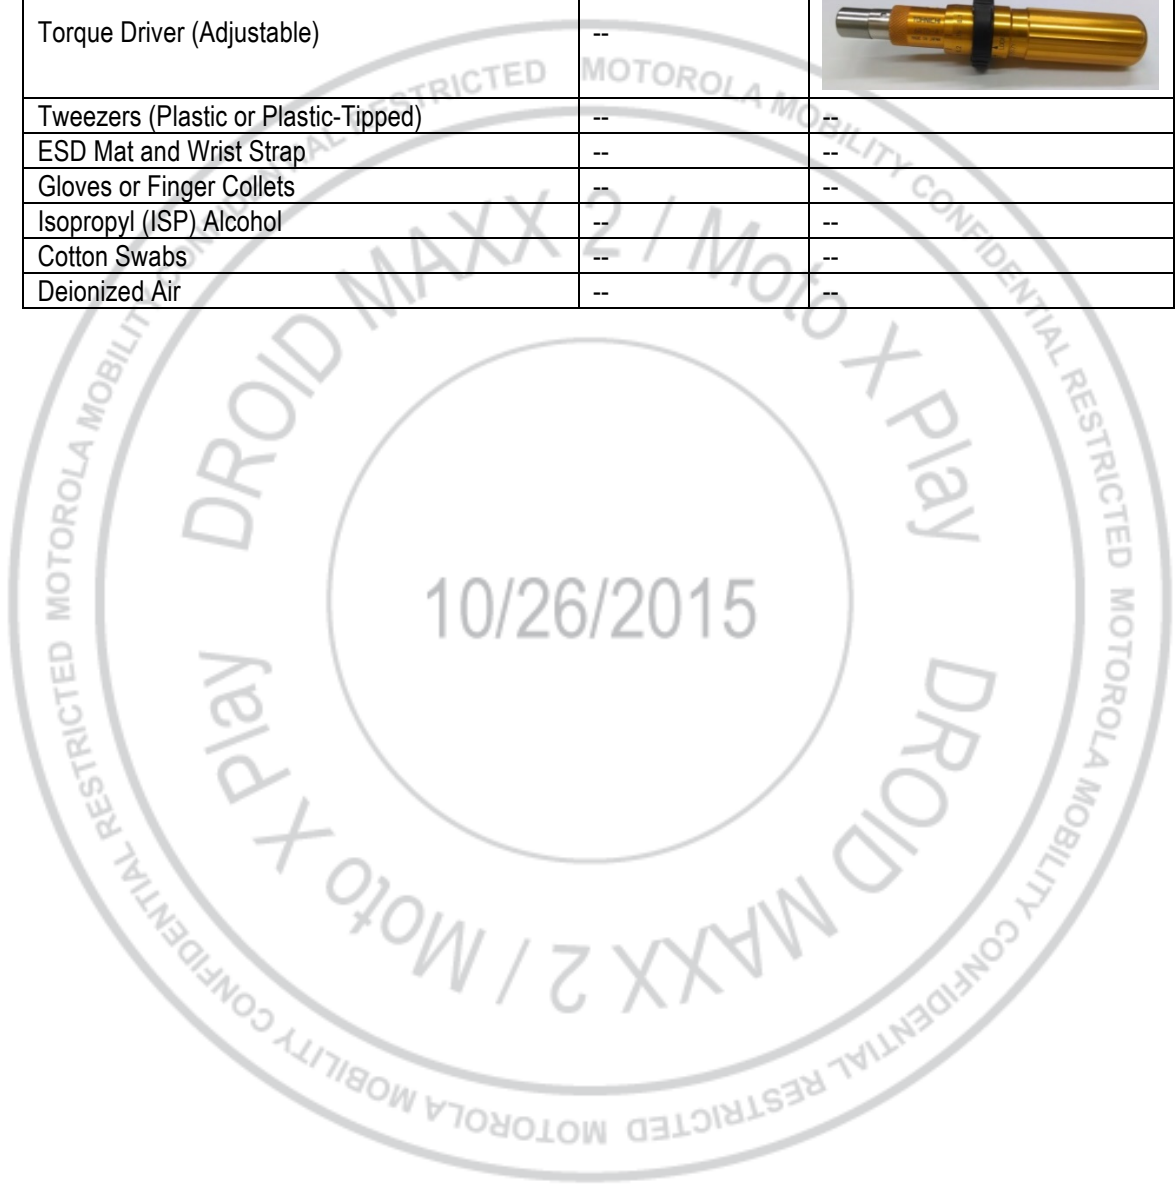

Tools Required for Assembly

The following tools are required to assemble the DROID MAXX 2 / Moto X Play phone.

<i>Description</i>	<i>Part #</i>	<i>Picture / Drawing</i>
Universal Press Fixture	3-00-A3-10000	 A silver metal press fixture with a black handle and a yellow safety cord.
Universal Press Weights	3-00-E5-10000	 Three cylindrical metal weights of varying heights, each with a cross-shaped base.
Universal Nest	3-00-A7-10000	 A rectangular, dark brown, textured mat or nest.
Lynx Lens Alignment Fixture	4-00-Z6-10000	 A blue plastic alignment fixture with a central lens opening and various alignment points.

<i>Description</i>	<i>Part #</i>	<i>Picture / Drawing</i>
Lynx PCB Alignment Fixture	4-00-Z7-10000	
Lynx NFC Alignment Fixture	4-00-Z8-10000	
Lynx Bezel Alignment Fixture	4-00-Z9-10000	
Lynx Audio Gasket Alignment Fixture	3-00-C1-10000	
Blackstick	--	

<i>Description</i>	<i>Part #</i>	<i>Picture / Drawing</i>
3IP Torx Bit	--	
Torque Driver (Adjustable)	--	
Tweezers (Plastic or Plastic-Tipped)	--	--
ESD Mat and Wrist Strap	--	--
Gloves or Finger Collets	--	--
Isopropyl (ISP) Alcohol	--	--
Cotton Swabs	--	--
Deionized Air	--	--

Display Preparation

Description	Reference #
ASSY,HSG,FRNT,PROTO, LUX DARK ASSY,HSG,FRNT,PROTO, LUX WHT ASSY,HSG,FRNT,PROTO, LUX DARK	1

1. Remove the Loudspeaker Gasket from the carrier.
2. Place the Loudspeaker Gasket into the Lynx Lens Alignment Fixture (4-00-Z6-10000), using the pins in the fixture to align it.

3. Place the Display into the fixture over the Loudspeaker Gasket.
4. Press down on the Display for 5 seconds to secure the Loudspeaker Gasket.
5. Remove the Display from the fixture.

6. Remove the LED Shield Copper Tape from the carrier.
7. Place the LED Shield Copper Tape into the fixture, using the pins in the fixture to align it.

8. Place the Display into the fixture over the LED Shield Copper Tape.
9. Press down on the Display for 5 seconds to secure the LED Shield Copper Tape.
10. Remove the Display from the fixture.

11. Remove the Touch Shield Copper Tape from the carrier.
12. Place the Touch Shield Copper Tape into the fixture, using the pins in the fixture to align it.

13. Place the Display into the fixture over the Touch Shield Copper Tape.
14. Press down on the Display for 5 seconds to secure the Touch Shield Copper Tape.
15. Remove the Display from the fixture.

16. Remove the Tertiary Microphone Mesh from the carrier.
17. Place the Tertiary Microphone Mesh into the fixture, using the pins in the fixture to align it.

18. Place the Display into the fixture over the Tertiary Microphone Mesh.
19. Press down on the Display for 5 seconds to secure the Tertiary Microphone Mesh.
20. Remove the Display from the fixture.

21. Remove the Notification LED Gasket from the carrier.
22. Place the Notification LED Gasket into the fixture, using the pins in the fixture to align it.

23. Place the Display into the fixture over the Notification LED Gasket.
24. Press down on the Display for 5 seconds to secure the Notification LED Gasket.
25. Remove the Display from the fixture.

26. Remove the liners from the LED Shield and Touch Shield Copper Tapes.

27. Place 2 adhesive strips on top of each other in each of the 2 Front Housing locations indicated.
28. Inspect the adhesive strips for proper placement. The strips should be close to the alignment pins and not cover the grounding pockets.

Rear Housing Preparation

ASSY,HSG,REAR,LUX TIN SLVR ASSY,HSG,REAR,LUX	1
GROM,MIC,SEC MIC, LUX	2
GSKT,ACSTC CHAMBER, LUX	3
LBL,WATER, DETECT	N/A

1. Place the Rear Housing WDL in the pocket as shown.

2. Place the Rear Housing into the Lynx Bezel Alignment Fixture (4-00-Z9-10000).

3. Place the Lynx Audio Gasket Alignment Fixture (3-00-C1-10000) into the recess in the Rear Housing.

4. Remove the Audio Gasket from the carrier.
5. Place the Audio Gasket over the Rear Housing, using the pins in the alignment fixture to align it.
6. Press down on the Audio Gasket for 5 seconds to secure it to the Rear Housing.

7. Remove the liner from the Audio Gasket.

8. Remove the Lynx Audio Gasket Alignment Fixture from the Rear Housing.

// CAUTION //

The Audio Gasket liner and Lynx Audio Gasket Alignment Fixture must be removed from the Rear Housing. Damage to the phone or incorrect assembly may occur.

9. Use the Tweezers to place the Secondary-Microphone Grommet into the Rear Housing.

PCB Preparation

- Place 2 locating pins in the PCB Alignment Fixture (4-00-Z7-10000) in the locations shown.

2. Remove the liner from the silver side of the Rear Heat Spreader.
3. Place the Rear Heat Spreader into the fixture, using the pins in the fixture to align it.

4. Place the PCB into the fixture.
5. Press down on the PCB for 5 seconds to secure the adhesive.
6. Remove the PCB from the fixture.
7. Peel the remaining liner off the Rear Heat Spreader.

8. Remove the PCB Adhesive from the carrier.
9. Place the PCB Adhesive into the fixture, using the pins in the fixture to align it.

10. Place the PCB into the fixture over the adhesive.
11. Press down on the PCB for 5 seconds to secure the PCB Adhesive to the PCB.

12. Remove the PCB from the fixture.

13. Remove the 2 locating pins from the fixture.
14. Place the 2 locating pins in the positions shown.

15. Place the PCB into the fixture.
16. Remove the liner from the silver side of the Front Heat Spreader.
17. Place the Front Heat Spreader into the fixture, using the pins in the fixture to align it.
18. Press down on the Front Heat Spreader for 5 seconds to secure it to the PCB Shields.

19. Remove the PCB from the fixture.
20. Peel the remaining liner off the Front Heat Spreader.
21. Place the 2 PCB WDLs on the PCB in the locations shown.
22. Press down on the WDLs for 5 seconds to secure them to the PCB.

/// WARNING ///

Failure to adhere to Safety Critical Note(s) may increase risk of rupture, burning, or failure to function safely when used by the customer. Refer to the Battery Safety Guidelines.

// CAUTION //

Handle the Battery Pack with care. If dropped to the floor, it may be internally damaged and must be scrapped.

Ensure Battery and its insulation are not damaged (e.g. scratched, dented, punctured) prior to and throughout assembly.

Prior to assembly, ensure Battery edges and surfaces are not dented or deformed, and that fixtures and parts that will contact the Battery are free of foreign material.

Ensure screws and screwdrivers do not contact the Battery.

1. Remove the liner from the Battery Adhesive.
2. Hold the flat end of the Blackstick against the SIM/SD Tray slot on the PCB as shown.

NOTE

The Blackstick is used to correctly distance the Battery from the SIM/SD Tray slot.

3. While holding the flat end of the Blackstick against the SIM/SD Tray slot, place the Battery over the Battery Adhesive.

4. Press down on the Battery for 5 seconds to secure it to the PCB.

// CAUTION //

Do not connect the Battery at this time. Damage to the phone may occur. The Battery must not be connected until Rear Housing Assembly.

5. Verify that there is a gap between the Battery and SIM/SD Tray slot.
