Technical Specifications

MOBILE INTERNET

Access the Mobile Internet to check out movie listings or directions to a club while on the move. The Motorola C330 series with 'always on, always connected' GPRS technology[5], plus a new Motorola WAP browser, keeps you at the cutting edge.

5 GPRS Technology through the use of packet data allows to be Always on Always Connected. This is subject to network coverage, capacity and implementation issues, device power and product performance.

GAMES ADDICT

Test your reflexes with Astrosmash™ and destroy the falling objects. Avoid the crash and burn as you race to a finish in MotoGP™. Plan a strategy to lose all your cards in Snood 21®. Idle moments have never been so much fun! By mastering the levels you can access new exciting challenges from hellomoto.com.

C330
series

MOTOROLA
intelligence everywhere™

Break the rules! Personalise your phone from the inside out. With the Motorola C330 series, you get to choose the look – not just its colour, but its shape too.

But there's more to it than looks, with polyphonic ringtones for a richer sound, MotoMixer tone editing and animated picture messaging. You can even use the mobile Internet to download new digital content[1]. Screensavers, wallpapers and ringtones, whatever you're into, you choose. It's a phone that truly suits you all of the time…

The Motorola C330 series. Make it totally yours.

Colour: Frosted Silver

SHAPE SHIFTER

Think of the C330 series as a skeleton. Then add flesh to the bones to bring it to life. Snap on a hard-edged cover or, for a completely new look, opt for a different body: shapely or highly curvaceous[2]. Alternatively, personalise it with a funky designed cover[3].

TAKE A THEME

Who's your favourite cartoon character – Taz, Roadrunner, Bugs? Need a round-the-clock reminder of how much you love to party? Theme and personalise your phone with downloadable digital media – combining ringtones with wallpapers and animated screensavers. Available in themed packs or as standalone items.

LOUD AND PROUD

Polyphonic ringtones on the Motorola C330 series are big news. With 16 audio channels, you can hear far more than before. Think actual instruments: guitar, drums, bass, keyboards. By downloading your favourite tunes, you'll soon transform your phone into a travelling sound system. Ensure you stand out from the crowd – and lift your mood – every time it rings!

MIX IT UP, DJ

Amazing polyphonic ringtones and unique MotoMixer software put you in complete control of your sounds. Your keypad becomes a mini mixing deck, allowing you to remix tunes your way. It's the latest desirable DJ toy.

SAY WHAT YOU FEEL

Everyone knows the advantages of messaging – easy, quick and affordable. Now you can be much more emotive with enhanced messaging (EMS[4]). Express yourself clearly on the C330 series with a range of fun animations, pictures, tunes and sounds added to your text. It couldn't be simpler to describe your feelings. Choose from the images on the phone or download your own favourites.

4 The advanced features of EMS 5.0 sound, pictures and text) are received and understood by all EMS 5.0-enabled phones. Other phones receive text only.

GET TALKING

Know when that special person calls. Assign a specific picture or ringtone to any phonebook contact. In addition, the chat function allows you to simply key in your name, start texting and watch the gossip unfold on your screen.

WORSHIP YOUR ICONS

Fall in love with the simple-to-use, animated icon-based menu system of the Motorola C330 series. Re-order and prioritise icon listings for quick and easy access to the features you use most, plus easy-to-view greyscale display.

1 Full range of downloadable themes to be determined, and subject to availability.

2 One body type supplied as standard; other body covers are available from www.hellomoto.com or your local retailer.

3 The Motorola C330 series product design allows you to change the shape and colour of your phone. Unlike ordinary accessory covers, the Motorola C330 series 'convertible covers' offer a variety of different looks that constitute the housing of the phone. We recommend the use of Motorola 'convertible covers,' since they have been tested for compliance with applicable mobile phone standards and regulations, including Specific Absorption Rate (SAR). Motorola does not warrant that the usage of non-Motorola convertible covers or housings will meet such applicable standards and may invalidate your Motorola warranty.
