

Compliments

Thanks in deed for purchasing this cell phone of Motorola which takes pride in its world–best radio communication technology. All of the Motorola cellular communication equipment are designed and manufactured in compliance with the in–house strict standards and international standards, and especially, they are subjected to stringent quality tests in connection with temperature, humidity, impact, dust, vibration, and drop before being released. We assure you that the Motorola products manufactured through these processes give you high quality satisfaction.

Thank you again for selecting our products, in the hope that you would succeed in your business with your MS400.

Any content of this manual and any function of this product are subject to change according to situation. We suggest that you set your phone to vibration mode at a public place in order to observe right manners in using the phone.

Removal or change of ESN (Electronic Serial Number) installed in the cell phone manufactured and supplied by Motorola, or an attempt to reproduce and enter another ESN in the cell phone shall be deemed an illegal act. Any person who commits such an illegal act shall be sentenced to ten or less years' penal servitude or fined 20 million or less won pursuant to Article 347 of the relevant criminal law. In addition, such an illegal act may damage the software installed in the phone, with the result that the phone cannot be used any longer.

Thus, customers are required to use care not to incur any damage due to such an illegal act. Especially, once such an illegal act is identified, both the free and paid services warranted by Motorola are rejected.

Precautions

- Do not lend your own phone to other person inadvertently.
- For repairs or other services, contact our designated service center.
- If your phone has got lost or stolen, immediately report to the relevant telecommunications service provider.
- Using chargers, handsfree kits, data communication cables, batteries, or equipment other than the genuine ones may deteriorate this product's performance or cause malfunction, external deformation or breakage. You are required to restrain from using unauthorized devices.
- Input data such as telephone numbers for a cell phone may be corrupted due to user's inadvertence or unexpected problem. Thus, you had better record important data separately.
- If the cell phone or battery is immersed in 'water' or 'liquid', the color of immersion checking label affixed to the cell phone or battery is changed. In the case of malfunction due to such reason, free service warranted by Motorola is rejected. (The immersion checking label is affixed inside the product, too.)

This product should not be added with any separate equipment that may cause an alteration to its original performance as described on type registration.

Prohibition of Illegal Modification of ESN

Safety Information

Exposure to radio frequency and signal

Your cell phone receives/sends out high radio frequency (RF) energy when it is ON.

International Institutes have set standards and recommendations for the protection of public exposure to RF energy.

- US FCC Code of Regulations ; 47 CFR part2 sub-part J*
- ANSI IEEE C95.1 (1992)*
- IEEE C95. 1 (1999)*
- NCRP Report 86 (1986)*
- ICNIRP (1998)*

Department of Health and Welfare Canada, Safety Code 6 (1999)

Communication Commission Australia, Radio Frequency Exposure Guidelines (1999)

** Federal Communication Commission ; American National Standards Institute ;
National Council on Radiation Protection and Measurements ; International
Commission on Non-Ionizing Radiation Protection*

Antenna

Use only the antenna authorized by Motorola. Using an unauthorized antenna or modifying it illegally may damage your phone, which rejects the free services offered by Motorola. Never use a damaged antenna. Allowing your body to contact the damaged antenna may cause a slight burn.

Normal position for operation

Hold your phone in the manner as when holding the general type telephone and place the antenna straight over your shoulder.

Efficient phone operation

Hold your phone in the manner as when holding the general type telephone, with the antenna placed straight over your shoulder. Speak distinctly to your phone with your mouth placed near the transmitter.

Never touch the antenna during a call. Touching it may degrade speech quality and cause the phone to transmit more power than necessary.

External cases

To minimize exposure to RF energy, it is desirable to attach the external case supplied by Motorola or approved by the related standard during a call. Using an unauthorized case which is not supplied by Motorola or approved by the related standard may cause exposure more than specified. In the event that the above case is not used or during a data call, separate your phone and antenna by at least 2.5cm off your body.

*For Motorola-approved accessory list, visit 'www.mymotorola.co.kr'.

Cell phone and electronic equipment

Most electronic equipment is shielded from high RF signals. However, some equipment may not be shielded against RF signals from your phone and cause malfunctions when you use it.

Aircraft

Switch OFF your phone before boarding an aircraft. The cell phone could interfere with the electronic navigation devices of an aircraft.

Cautions for using MP3

If you wear a cell phone around your neck like pendant, place the phone in the normal position of your ear side or separate the phone and its antenna more than 2.5 cm from your body.

Safety Information

Pacemakers

The Health Industry Manufacturers Association recommends that a minimum separation of fifteen centimeters (15cm) be maintained between a cell phone and a pacemaker to avoid potential interference with the pacemaker. If it is unavoidable for a person with pacemaker to use a cell phone, he/she should maintain a separation of 15cm or more between the cell phone and the pacemaker. Persons with pacemakers should always use the phone in the opposite side of the pacemaker to minimize interference. Turn your phone OFF as far as possible.

Hearing aids

Some cell phones could interfere with a hearing aid.

Other Medical Devices

If you use a medical device personally, consult its manufacturer to determine if it is adequately shielded from external RF energy. Turn your phone OFF in hospitals or health care facilities which may be using equipment that could be sensitive to external RF energy. Some hospitals are using RF equipment.

Efficient phone operation

Be sure to abide by the laws relating to the use of cell phone while driving. And observe the following guidelines.

- Give full attention to driving.
- Do not use your cell phone while driving for safety purpose. Use a handsfree kit, if unavoidable to use the phone.
- Pull off the road and park before making or answering a call if driving conditions so require.

Vehicles equipped with air bags

An air bag inflates with great force in a moment. If in-vehicle handsfree kit is installed within the coverage of inflation and the air bag inflates, serious injury could result. Be sure to place the handsfree or other objects out of the area of the air bag operation.

Blasting Areas

To avoid interfering with blasting operations, turn your phone OFF when in a "blasting area" or in areas clearly marked: "Turn off two-way radio."

Obey all the instructions and signals posted in the area.

Potentially Explosive Atmospheres

Do not remove, install or recharge the battery in a potentially explosive atmosphere. And turn off your phone. Obey all the instructions and signals posted in a potentially explosive atmosphere. Construction crews often use remote control RF devices to set off explosives. Do not install or use accessories onto your phone in a potentially explosive atmosphere including gas leak areas, fuel or chemical transfer or storage facilities, and deck on boats. Also, do not place any inflammables near in-vehicle accessories for car phone. Very rarely, but sparks from your phone or accessories could occur. Sparks in the area could cause a fire or explosion.

How to Use the Battery Pack

 **Caution!** If the battery terminal contacts a conductor(key, jewelry, etc.), it may cause damage to other object or bodily injury such as a burn. When the battery terminal contacts a conductor, the battery becomes a part of the closed circuit and produces heat, becoming so hot.

Handle the charged battery very cautiously. Especially, store the battery in a battery case when placing it together with other metallic objects into your pocket or bag.

Using cell phone while charging the battery

Using your phone while charging the battery may cause electric shock. Be sure to separate it from the charger before using it.

Handling cell phone while charging the battery

Charge the battery in a safe place out of children's reach, if possible.

3. Description of Basic Icons

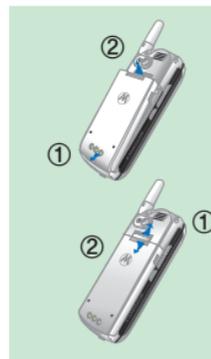

To reduce battery consumption, if the set lighting time arrives, the LCD lights off automatically. (See page 80.)

If you press or after lighting the LCD off in the slide's closed status, the screen is changed into screen saver mode and you can check the current time. When, however, SMS is received or the absent subscriber popup window is displayed, the above function does not work.

- To indicate the signal strength level in the current service area
- To indicate that the service cannot be connected
- To indicate that the called party's phone is busy or NATE is connected
- To indicate that the service cannot be connected
- To indicate that the cell phone has been set to 'Lock' mode This symbol disappears when you clear it.
- To indicate that voice message and text message are received. This symbol disappears when you confirm the message.
- To indicate that Broadcast
- Color Mail
- Color and Text Message simultaneously receive alarm(Quick Set, My Favorite Alarm, Morning Call) has been set to ON. This symbol disappears when you clear it.
- To indicate that the receive tone has been set to Bell only mode.
- Vib Only Lamp
- Vib & Bell
- Vib Then Bell
- Louder
- To indicate that the receive tone has been set to Etiquette mode This symbol disappears when you clear it.
- To indicate that a remaining battery capacity
 - Full Charged

- Display that the phone has been set to 'Auto Answer'.
- Displayed when you use handsfree kit. I.
- Displayed when you play music.

4. How to Use Battery Pack

1. Cell Phone and Battery Pack

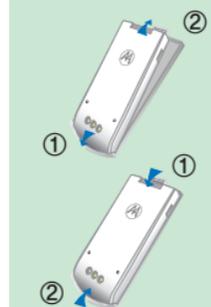

1. Assembling

- ① Fit the battery pack correctly into the groove provided on the bottom-hand side of the handset
- ② Slide it all the way in the arrow direction until a 'click' is heard.

2. Removal

- ① Push removal button in the top direction.
 - ② Remove the battery pack from the handset in the arrow direction.
- ※ Before removal the battery pack, be sure to turn off the power of the phone.
(Forcible removal of the battery pack may cause malfunction.)

2. Battery Case and Battery Pack

1. Assembling

- ① Fit the battery pack correctly into the groove provided on the bottom-hand side of the battery case.
- ② Slide it all the way in the arrow direction until a 'click' is heard.

2. Removal

- ① Gently lift the right assembled side and push the battery pack from behind.
- ② Remove the battery pack from the handset in the arrow direction.

4. How to Use Battery Pack

3. How to Charge the Battery Pack

1. Since the cell phone is not completely charged when you purchase, use after charging completely.

Charging the cell phone with a desktop charger (use after connecting to a travel charger)

- Insert the travel charger to the port in the rear side of the desk charger
- Connect the power plug of the travel charger to an outlet. (exclusive use for 110V ~ 240V)
- Check if the lamp with triangle shape mounted on the jack of the travel charger cable is flashing after the lamp is turned on in orange color.
- Insert the cellular to the charger socket of the desk charger stand to charge. You can charge the battery assembled with cell phone or can only charge the battery without the phone by putting into a slot. (Since the charger has a single-slot, you cannot charge two batter packs simultaneously.)
- The charge status in progress is displayed on the lamp with triangle shape in the jack of a travel charger cable.

2. Charging the battery pack with a desk charger (use after connecting to a travel charger)

- Slide it all the way in the arrow direction until a 'click' is heard after standing up battery pack in 45° direction.
- Since the charger has a single-slot, you cannot charge two batter packs simultaneously.

4. How to Use Battery Pack

3. How to Charge the Battery Pack

3. Charging with a travel charger (optional)

- Connect the power plug of the travel charger to an outlet. (exclusive use for 110V ~ 240V)
 - Check if the lamp with triangle shape mounted on the jack of the travel charger cable is flashing after the lamp is turned on in orange color.
 - Insert the travel charger to the port in the rear side of the cell phone.
 - The charge status in progress is displayed on the lamp with triangle shape in the jack of a travel charger cable.
- ※ Optional travel charger: Motorola sells extra standard chargers for user convenience and resource recycling.
Purchase it from the store you purchase the cell phone or nearby service center.

4. How to Use Battery Pack

■ Precautions while using the battery/the charger

Use authorized battery and charger only.

You must use authorized products that the maker provides or sells as unbundled product. Unauthorized battery or charge may cause to reduce the life cycle of your cell phone or lower the performance and cannot guarantee the safety of the product.

Cautions

- ① Use the standard charger certificated by TTA
- ② Use an authorized battery provided/sold by the maker.
- ③ Do not leave the battery in the closed space with high temperature for a long time.
- ④ Do not immerse in water or give a serious shock.
- ⑤ Do not disassemble the battery. It may cause fire.

4. Charging battery pack status

Classification	In charging	Completion
Cable jack	Red	Green

<If the lamp is flashed in red>

- The charging terminal has poor contact. Check if the battery is clean and charge again.
- The battery or others are defective. Contact with our service center.

<If the lamp lights in orange>

- The place is too hot or cold.
- If temperature changes in room temperature, the lamp is changed into red and the battery pack starts to be charged.

4. How to Use Battery Pack

5. Charging time

Classification	680mAh (Slim)	950mAh (Standard)
Time	About 120 min.	About 130 min.

- The charging time may vary depending on the battery status or the charger.
- If the AC power applied to the power adapter is low, the charging time may be longer.
- If the ambient temperature is too hot or cold, the battery pack is not charged well. Always charge in room temperature.

6. Using time for battery pack

Classification	680mAh (Slim)			950mAh (Standard)		
	Slot mode 0	Slot mode 1	Slot mode 2	Slot mode 0	Slot mode 1	Slot mode 2
Standard hold time	About 80~100 hours	About 110~130 hours	About 140~170 hours	About 100~130 hours	About 150~180hours	About 200~230 hours
Standard call time	About 110 min.			About 150 min.		

- During call in progress or when using NATE, @Playon, NATE Air, WINC, game and MP3, more current is consumed than that of the hold time. In addition, more call time makes shorter hold time.
- The current to receive a call is equal to the current to send a call.
- Hold time becomes shorter in out-of-service area.
- Service time may vary according to charge status, temperature (high/low), wave status in the place, background light and light status.
- ※ The above service of a battery pack is the measured data on the basis of 'the measurement of cell phone battery service time and display standard' by Korea Consumer Protection Board.

1. Power ON and OFF	27
2. Placing a Call	27
3. Receiving a Call	29
4. Missed Call	34

1. Power ON and OFF

1. Power ON

Press 

- The service provider logo and a graphic set by the user are displayed, and then the phone is reset to the initial screen.
- The graphic can be downloaded from NATE and changed in 'Display Setting' under 'Display Setting'. The graphic may be displayed late on the LCD depending on the capacity of the graphic downloaded. (See page 77 for Setting Graphic.)

2. Power Off

Press and hold 

- A graphic disappears and the power is turned off.
- The graphic can be downloaded from NATE and changed in 'Display Setting' under 'Display Setting'. The graphic may be displayed late on the LCD depending on the capacity of the graphic downloaded. (See page 77 for Setting Graphic.)

2. Placing a Call

Enter a desired phone number. ► Press 

- If you press and hold  on the initial screen, the number dialed last is connected. If the phone is not connected, it is redialed automatically.
- If you press a wrong number, you can use  to correct it.
- The call time is displayed on the display screen automatically. Call time is counted from the point of time for the connection with the called party.
- When 'Lock All' is set in cell phone, you can place a call after entering the lock code.
- You can change numeric type displayed in screen by pressing  or  when you enter the number in initial screen. (See page 127.).

2. Placing a Call

1. Placing a call from Phone Book

Use the Recall feature to select a desired person to call. (See page 138–145 Searching Phone Number)

Select a person to call ▶ Select an item to call ▶ Press

- Selecting a person to call and pressing connects you to the number set to 'Representative Number' among the items with phone numbers stored.
- By pressing 'Phone Book' on the initial screen, you can search phone numbers stored in the phone book in the methods of 'Search All', 'By Group', and 'By Location Number'.

2. Electronic Dialing

You can use this function conveniently by entering several phone numbers in advance according to the audio announcement when using ARS(for telebanking service or voice message confirmation). To cancel electronic dial, press [Cancel] during a call.

Input Buton	Operating Method
P	The numbers after 'P' can be sent only if the or is pressed.
T	The numbers after 'T' are sent automatically shortly after.

Input a phone number ▶ Enter 'P' or 'T' and then a number to be dialed electronically ▶ Press

2. Placing a Call

3. Turbo Dialing

Pressing and holding a location to call on the initial screen connects you to the representative number of the appropriate location.

(Ex: If the location number is 17, press the dial button shortly, and press and hold ,
If the location number is 173, press the dial button and shortly, and press and hold)

3. Receiving a Call

If a call is received, open the slide to receive the call.

- When a call is received with a ringer tone or vibration, if you press and hold or the ringer tone is switched to mute.
- If you have already registered 'Caller ID' service with your provider, the caller's number is displayed on the display screen.
- You can change ringer tone, receive mode (Send Button, Any Button, 3 Sec Auto Receive, Slide Open), and receiving status (Bell/Vib, Setting Graphic).
- When a call is received, The graphic can be downloaded from NATE and changed in 'Display Setting' under 'Display Setting'. The graphic may be displayed late on the LCD depending on the capacity of the graphic downloaded. (See page 77 for Setting Graphic.)

3. Receiving a Call

1. Receiving a Call with the Earpiece

With the earpiece connected, if a call is received, you can receive the call by send button, any button, auto receive after 3 sec or slide open.  Or, press the button on the earpiece to receive the call. When the call is ended, press the button on the earpiece to disconnect the call.

2. Setting Receive Mode

For receiving a call, you can receive a call through the receiving way previously configured.

[Menu] ▶ Select Phone Care ▶ Select Receive Mode ▶ Press  and select a desired menu and then press  [OK]

- SEND Button : You can answer calls placed to your phone when pressed .
- Any Button : You can answer calls placed to your phone when pressed all button except  button.
- 3 sec Auto Receive : After receiving tone sounds for 3 seconds, the call is connected automatically.
- Slide : You can answer calls placed to your phone when slide is opened.

3. Receiving a Call

3. Using Auto Answer

If you cannot receive a call, this mode switches the call to Auto Answer.

[Menu] ▶ Select Convenient Function ▶ Select Auto Answer ▶ Select a desired menu

- Pressing  in the initial screen enables you to move to Auto Answer menu directly.

1. Setting and Clearing

Select Auto Answer ▶ Press  to select Setting/Ment/Speaker ▶ Press  and select setting value and press [Complete] .

- If recording capacity is insufficient, Auto answer mode cannot be set and a message 'No more space for recording' is displayed. Delete Recorded List from 'Auto Answer Message' and then set Auto Answer. (See page 32 for Deleting Recorded Message)

3. Receiving a Call

- Setting : You can set on or off the Auto Answer.
- Comment : You can select the speech announced when you set Auto Answer (General, In Driving, In Conference, In Class, User Recording)
- Speaker : You can set whether or not to make the called party's voice sound heard outside.

2. Listening to Content Recorded in Auto Answering Machine

Select Auto Answer Message ▶ Select recorded message to play and then press [OK].

- The content recorded in the Auto Answering Machine can be played back using 'Auto Answer Message'.
- You can store up to 20 messages of Auto Answer Message. One message can be recorded up to 3 minute and can be recorded up to 30 minute about all messages.

3. Deleting Recorded Messages

Select Auto Answer Message ▶ [OPTION] when the recorded list is displayed. ▶ Select a desired Delete menu (Delete/Clear All). ▶ Select a setting.

3. Receiving a Call

4. Recording a Comment

Select Record Comment. ▶ Select Auto Answer Comment, and then press [DONE].

- The comment recorded by the user can be confirmed in 'User Recorded Comment'.
- If recording capacity is insufficient, a message 'No more space for recording' is displayed when selecting record comment. Delete Recorded List from 'Auto Answer Message' and then record an auto receive comment. (See page 32 for Deleting Recorded Message)

5. Confirming a Comment

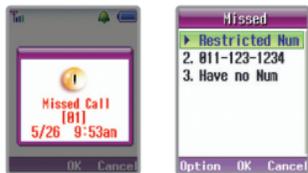

Select Play Comment. ▶ Select an Auto Receive to confirm, and then press [OK].

- To delete a recorded comment, press [DEL] during playing back 'User Recorded Comment' in 'Play Comment'. However, the default comments cannot be deleted.

4. Missed Call

If the user fails to receive a call, the following image is displayed on the display screen.

- When the 'Missed Call' message box is displayed on the initial screen, if you press  [OK], the 'Missed Call List' is displayed.

However, if the called party's number is a call restrict one or you have not yet subscribed for 'Caller ID' service, 'Call Restrict' is displayed on 'Missed Call List'.

At this time, if you press  [OK], you can confirm the date and time.

- To confirm from the menu, you can confirm in 'Missed Call' under 'Recent Call in Phone Book'.
- Pressing  or  [Cancel] moves you back to the previous screen.

Inputting Characters

- | | |
|--|----|
| 1. Changing Character Input Mode | 36 |
| 2. Inputting Korean Characters | 36 |
| 3. Inputting English Characters and Numbers | 37 |
| 4. Inputting Special Symbols and Icon Characters | 38 |
| 5. Editing and Correcting Characters | 38 |
| 6. Deleting Characters | 38 |

Using Menu Function

IV

1. Setting Auto Roaming	40
2. Connecting NATE	41
3. Using @Playon	43
4. Using MOD	46
5. 011 Service	51
6. **114 Service	53
7. NATE Air	53
8. Using WINC(Mobile Address)	60
9. Using NATE PhoneP	61
10. Using MP3	62
11. Using External Memory (Trans Flash)	64

1. Setting Auto Roaming

If the user uses 2 or more numbers or has subscribed for 2 or more service providers, he/she can select one of those subscribed numbers and also use his/her cell phone even abroad.

[MENU] ▶ Select SKT Service ▶ Select Auto Roaming, and then enter your password ▶ Check the precaution ▶ Select a desired system

- Korea (SK Telecom) : Used when you use your cell phone at home.
- Auto Sel: If you select Auto Selection and the terminal in the called area continues to be in No Service status, select A Area(such as China) or B Area(such as USA) in the Auto Roaming.
- A Area (such as China) : Selected when you use your phone in China, Hong Kong, New Zealand, Guam, Saipan, USA(Atlanta)
- B Area(USA, etc.) in the Int'l Auto Roaming.

- If you select Auto Selection, A Area (such as China), or B Area (such as USA) at home, you cannot make a call.
- For detail, contact the SK Telecom International Auto Roaming Customer Center at 1566-2011.
- After you select a desired mode, the phone turns OFF and then ON again. If it is not rebooted automatically, press to turn the power ON. (See page 27 Power On)
- The default number has been factory-set to '0000'. Do not change the system information at your own discretion. If it is unavoidable to change the information, contact the service center before using it.

2. To connect NATE

You can connect wireless internet NATE to search various information or download various contents such as games, karaoke, multimedia files, and ringer tones.

[Menu] ▶ Select SKT service ▶ Select NATE Connect. ▶ NATE is connected and accessed

- Pressing and hold in the initial screen enables you to move 'NATE' on line status directly. If you want to exit from NATE connection, press .
- When NATE is accessed '' is displayed on the display screen.
- If you access a site requiring security, a security icon is displayed on the display screen.

1. Using NATE Menu

NATE 접속 중 [메뉴] 눌러 메뉴 사용

- The contents and selection mode displayed on the screen are subject to change depending on the service provider's situation.

2. Using NATE

- History: Displays up to 10 sites accessed by the user recently.
- Move: Enables user to move the WEB page easily.
 - Home: Enables user to the highest site. (Moving to a set page)
 - Refresh: Enables user to display the current site again.
 - Enter New URL: Enables user to move by entering the address of a site to access.
 - Previous Page: Enables user to move to the site visited a moment ago.
 - Next Page: Enables user to move to the next page when user moved to the previous page.
 - Search: Enables user to access to the search site provided by NATE.
- My Menu : Enables user to search or edit user's own menus by registering those menus searched by the user frequently and using My Menu viewing.
 - Adding My Menu: Enables user to add frequently searched pages to My Menu.
 - Viewing My Menu: Enables user to view the pages added to My Menu.
- Useful Tool :
 - Search Phone Number: Enables user to search phone numbers stored in the phone while NATE is accessed.
 - Music Player : Enables user to use 'MOD' menu in the phone while NATE is accessed.
 - Store Web Page: Captures the WEB page accessed currently on the screen. The site stored in the WEB page can be viewed in 'Capture Screen' under 'MENU' 'Convenient Function'.
 - Delete PicturePal : Deletes an image friend stored in the phone.
 - Delete Melody: Deletes a melody stored in the phone.
 - Setting: Enables user to select scroll and WAP version displayed on the screen.
- Help: Enables user to check the information about the browser.

- Service provider's NATE service was produced as of 04.12.01, and the content of NATE service is subject to change for improvement and service development.

For the detail, refer to NATE home page, www.nate.com, or contact SK Telecom Customer Support Center (1566-0011).

3. Using @Playon

This function enables you to download various contents such as games, moving pictures, and securities from NATE @Playon. The downloaded contents are stored in @Playon. For the detail, contact your service provider.

[MENU] ▶ Select SKT Service ▶ Select @Playon ▶ Select content to run and then check it.

- Pressing  in the initial screen enables you to connect directly to @Playon.
- You can download phone theme contents and then set them as an image for the initial screen of the phone.
- To adjust volume of the selected content, press  or .
- If the memory capacity is insufficient, you can delete the existing contents before downloading. Even if a call is received while you are using the NATE Wizard, you can converse on the phone. Except for 1:1 game or network game, however, if you have subscribed for the NATE Call Waiting service, you can make a call. For the detail, contact your service provider. Once the call is ended, the NATE Wizard which had been used operates again. However, depending on the downloaded contents, the contents may not operate normally. If you select @Playon Connect, you are connected to the download site.
- If you want to exit from Contents, press .

3. Using @Playon

1. Using Downloaded Contents Menu

Select a desired contents. ▶ Press [MENU]  .

- Properties: You can check the information about the downloaded contents.
- Delete : You can delete the downloaded contents.
- Intra Move: You can change the order of downloaded contents at your discretion.
- Inter Move : You can change the names of downloaded contents and slide.
- Create New Folder : You can create a new slide and manage it.
- Rename: You can change the names of downloaded contents and slide.

3. Using @Playon

2. Setting @Playon Environment

Select Control Panel ▶ Select a desired environment

- Setting Status: You can confirm setting status such as the number of contents of @Playon, sound level, and remaining capacity.
- Sound Control: You can adjust the sound of @Playon. (in 0~5 steps)
- List Updating : The contents stored in @Playon are not deleted, but the slide created by the user or contents name are initialized to the default set.
- System File Deleting : You can delete @Playon system file.
- Whole File Deleting: You can delete the whole contents stored in @Playon.

4. Using MOD

You can download MOD contents (Music, Live Bell) by getting access to NATE or play the downloaded MOD contents.

[Menu] ▶ Select SKT service ▶ Select MOD ▶ Select the desired menu by pressing

- Press on the initial menu to directly move to the 'MOD' menu.
- If the cell phone has been set to etiquette mode, the 'Etiquette mode release' popup window is displayed.

1. Accessing to Music Home

You can readily download MOD contents by connecting to the Music Home in NATE.

Select Music Home access ▶ Connect to NATE ▶ Access to Music Home

- For the use of MOD, if the MOD contents are continuously played, a lot of current is consumed.
- The music and the Live Bell that you downloaded are automatically stored to 'My Album' and 'Live Bell' respectively.

4. Using MOD

2. Using My Album

You can replay the music downloaded.

Select My Album ▶ Select the music to confirm after selecting 'View all music' by pressing ▶ Press [Play]

- Recent music play : The list of the music that you have recently is displayed, and so you can play the music again.
- All music view : All music that you have downloaded in the cell phone is displayed.
- View by albums : The list of albums that you have registered is displayed and you can play music by albums.

- You can play the music you want by pressing [Select].
- You can download infinite music according to the capacity of the storable memory.
- You can receive the call when a call comes while playing music. After the call, the phone is converted to the music play mode.
- If you press after closing the slide while playing music, all buttons in the external key are disabled and the screen light is turned off.
- The lighting time of the music play mode varies depending on the mode configured in 'Setting Backlit' and 'Backlit Time' of 'Display Setting'. (See page 80 for Setting Screen Light)
- Press while playing music to display the list of music.
- is displayed on the screen while playing music.

4. Using MOD

1. Using Menus

[Recent music play]

Press [menu]

[All music view]

Press [menu]

View by albums

Press [menu]

- Register to album : you can register a selected menu to a desired album.
- Change sequence : You can change the sequence to play a selected music.
- Delete : You can delete a selected music. However, protected music is not deleted.
- Manage voice sources : You can check the information about voice sources (title, Copyrighter, playing time, Content size, Bitrate, available period, available playing counts and video information) of a selected music.
- Add new album : You can add new album to 'View by albums'.
- Rename album name : You can rename the name of a selected album.
- Delete album: You can delete a selected album.
- Access (#) to Music home : You can directly access to My Home of NATE.
- Access (#) to NATE : You can directly access to the initial screen of NATE.
- Manage (#) messages : You can send a message after you directly go to the Input mode of 'Writing Text Message'.

4. Using MOD

3. Using Live Bell

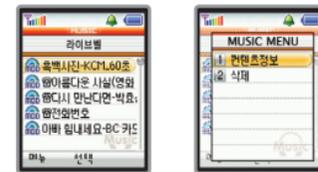

You can set or check the Live Bell downloaded.

- ▶ Select Live Bell
- ▶ Press [Select] after a desired Live Bell by pressing [OK]
- ▶ Press [Setting] after checking the Live Bell

- You can adjust the volume of bell sound by pressing [Volume Up/Down] while playing Live Bell.
- You can download infinite Live Bell according to the capacity of the storable memory.
- '🔔' is displayed on the screen while playing Live Bell.

1. Using Menu

Press [Menu] after selecting a desired list.

- Contents information : You can check the information about voice sources (title, Copyrighter, playing time, Content size, Bitrate, available period, available playing counts and video information) of a selected Live Bell.
- Delete : You can delete a selected Live bell. However, protected music is not deleted.

4. Using MOD

4. Setting Environment

Select 'Set Environment' ▶ Select a menu to set after pressing

- Basic play option : You can set the way to play music.
 - One time play / Sequence : You can play the music in the play list in order.
 - One time play / Random : You can play the music in the play list randomly.
 - nfinite repetition / Sequence : You can continuously play the music in the play list in order.
 - Infinite repetition / Random : You can continuously play the music in the play list regardless of the sequence.
- Player Skin : You can set the skin of music players. (Swing style, Punky style, Bluenote style)
- Effect Sound : You can set the button sound generated when a function key is pressed while playing music to On or Off.
- Close Slide While Playing : You can set the stop of the music in progress when you close the slide while playing music.
 - Continue : Musical performance continues when the slide is closed while playing music.
 - Stop : Musical performance stops when the slide is closed while playing music.
- Memory Information : you can check the memory information of the cell phone (entire memory, used memory, available memory).
 - Pre-listening/setting : You can set the pre-listening when you select a desired music in the list of 'My Album'.
 - Release Pre-listening : Pre-listening is disabled.
 - Set Pre-listening : Pre-listening is enabled.

5. 011 Service

This menu enables user to easily access various supplementary services provided by SK to register, cancel, or compile them. The 011 and 010 supplementary services can be used only by those users who have subscribed for them.

[MENU] ▶ Select SKT Service ▶ Select 011 Service ▶ Select a desired menu

● To exit connection, press

- SorisaSam
 - Connect: Enables user to confirm voice message recorded in the SorisaSam. (Connect No.: *89)
 - Register: When the phone is turned OFF or you cannot receive a call, the call is connected directly to the SorisaSam automatically. (Connect No.: *51)
 - Immediate Connect & Register : When the phone is turned OFF or you cannot receive a call, the call is connected directly to the Voice Source automatically. (Connect No.: *50)
 - Clear: Enables user to clear the registration with the SorisaSam. (Connect No.: *52)

 - Ringer Option: You can distinguish between the receiving tones of both the existing number and number plus number.
- Edit Supplementary Service: If 011/010 supplementary service connect numbers have been changed, you can change the connect number.
- Branch /Customer Service : You can directly access to customer service. (Access # : *114)

Using Menu Function IV

6. **114 Service

This service provides user with phone number, detailed location, and introduction of business firms such as restaurants and clinics provided by NATE near the user.

[MENU] ▶ Select SKT Service ▶ Select **114 ▶ Select a setting 'Yes' ▶ Connect NATE and then search phone numbers.

7. NATE Air

This is the broadcasting service provided by NATE, and you can receive various and massive changing information such as various news, stock prices, on-the-spot telecast, and moving picture.

It is available after prescribing the NATE Air supplementary service.

[MENU] ▶ Select SKT Service ▶ Select NATE Air ▶ Press  to select a desired menu

- If broadcasting messages or unknown messages are received, the in-coming broadcasting message icon  is flickered. The icon is disappeared after checking the message.

7. NATE Air

1. Confirming Broadcasting Message

1. Confirming Channel Message

Received broadcasting messages are stored by channel and displayed. When you search them by channel message, the numbers of received messages by channel and unidentified messages are displayed in the bottom of the display screen.

Press to select Channel Message ▶ Press to select Channel ▶ Press to select Message

2. Confirming Recent Messages

Broadcasting messages are displayed in the recently received order, regardless of channel.

Press to select Latest Message ▶ Press to select Message

7. NATE Air

2. Using Option Under Broadcasting

1. Deleting Messages

Press to select a message to delete ▶ Press and then select 'Delete Message' ▶ Select a message deletion method

- Delete selected message: You can delete only the selected message.
- Delete Read message: You can delete only the confirmed message among received ones.
- Clear All: You can delete all the received messages.
- Cancel: You can cancel deletion.

7. NATE Air

2. Protecting Message

You can set received broadcasting messages, so that they can be protected.

Press to select a message to protect ▶ Press and then select 'Protect Message'

- You can select only the protected messages and deleted them, but if you enter Clear All, the protected messages are not deleted.

3. Using Store Box

During using NATE Air, you can connect directly to (See page 43~45 for Using @Playon)

Press to select Store Box ▶ Move to @Playon

7. NATE Air

4. Setting Broadcasting Service Environment

Press to select Environment Setting ▶ Press to select a setting menu

1. Setting Reception Status

You can set whether or not to receive messages by broadcasting message channel, thus receive only the channel wanted by the user.

Press and select Reception Status Setting ▶ Press to set Reception Status after pressing and selecting a desired channel.

7. NATE Air

2. Alarm Sound Setting

You can set alarm sounded when a broadcasting message is received.

Press to select Alarm Sound Setting ▶ Press to set an interval of alarm, and then press to move ▶ Press to set an alarm sound

- └ Alarm Interval: Once No Sound
- └ Alarm Selection: (Alarm Sound 1~5)

3. Setting Basic Environment

You can use this service to set the range of content displayed when a message is received.

Press to select Basic Environment Setting ▶ Press to set Message Confirming Method

NATE Air

- └ Auto Confirming: When a broadcasting message is received, the terminal displays its content directly on the screen.
- └ Manual Confirming: The terminal displays that a broadcasting message has been received.
- └ No Displaying: The terminal sounds an alarm that a broadcasting message has been received, but the terminal maintains the initial screen.

5. Adding/Changing Channel

You can add or change channels to receive broadcasting messages by connecting the terminal to NATE.

Press to select Adding/Changing Channel ▶ Connect to NATE

8. Using WINC (Mobile Address)

In the past, you had to use inconveniently the keypad of the cell phone to input a long URL in order to connect the wireless internet to access a desired site. Comparative to this, WINC(Mobile Address) is a national public service which anyone can enter a number(figure), instead of URL, to connect to phone page easily.

For the detail, contact your service provider or refer to NATE Home Page <http://www.winc.or.kr>.

Press **Menu** in the initial screen ▶ Select WINC by using **OK** and Press **OK** ▶ Connect to NATE ▶ Enter a desired mobile address ▶ Connect to Phone Page of the entered mobile address.

■ Example of WINC(Mobile Address)

- SK Telecom: www.sktelecom.com/ Mobile address(WINC): 11#011

Visitable pages

- Yahoo Korea: 92466#3
- Club Cyon: 25822966#0
- Photo Meeting: 2580#1
- Freechal: 815#1
- SK Telecom: 11#011
- Korea Internet Info Center: 642#4500
- CoCoZen, Inc: 622#00
- Daum: 3286#2
- Weather Bureau: 562#131
- Song Guan Ho's Mobile World: 592646#007
- KBS: 527#0
- MSN: 676#0
- Maeil Newspaper: 678#1
- Lotto : 645#114
- Jelly Bell: 5355#1
- National Assembly: 62#1
- Cinema Theater: 33#9
- Shic: 7244257428464#1
- Homestay: 45#6

※ The above-mentioned list may not be able to be connected smoothly depending on the situation of the service provider.

9. Using NATE Phone P

NATE Phone P is a multi-media phone page provided only for SK Telecom users, and user can create his/her own home page on the internet space and manage it. User can manage the phone P by integrating personalized services such as address book, nate mail, portal mail, photo, mail, photo album on NATE, and also create his/her own ABATA to decorate his/her phone page. For the detail, contact your own service provider, or refer to Phone P Menu of Nate Home Page, <http://phonpi.nate.com>.

Enter the user's phone number **Menu** ▶ Connect to NATE ▶ Access to NATE Phone P

- If user has already created his/her own phone P, he/she should go directly to his/her own phone P. If not, he/she should move to a menu which enables him/her to create his/her own Phone P.
- To connect to his/her own Phone P, enter his/her phone number. To connect to his/her friend's Phone P, enter friend's phone number and then press **OK**.
- When you connect to NATE Phone P, you are charged with NATE fee.
- You can select and access to 'PhoneP' by pressing **Option** [Option] after selecting a phone number when you search the phone book

10. Using MP3

You can store, play, transfer and manage music files by downloading the 'Melon Player' provided by SK Telecom. For more detailed information about 'Melon Player', contact with your service provider or refer to 'http://www.melon.com'.

1. Downloading Melon Player

1. Access to 'http://www.mymotorola.co.kr' and download the USB driver program to install your PC.

※ Cautions : You must separate the phone from your PC before installing the USB driver.

The USB driver is automatically installed after downloading.

2. Connect the phone and to a PC via a data cable.

3. Access to 'http://www.melon.co.kr' and download/install the 'Melon Player' program in your PC.

4. Run the 'Melon Player' and download MP3 files.

■ What is SK Telecom Melon Player?

It is a free S/W for PC. It is a dedicated player that provides high-quality services such as download of MP3 music (DCF files), store, play, transfer via phone and management of music files.

2. Downloading MP3 files

- You can listen MP3 music by transferring to your PC or your phone supporting MP3 via SK Telecom Melon Player.
- After accessing via the Melon Player program, you can transfer a desired music to the phone supporting MP3. However, the phone supporting MP3 must be connected to the PC that Melon Player is installed. The PC can download and play without the connection with a phone.

In addition, the files downloaded to the PC can be re-transferred to a phone. However, a phone cannot transfer to a PC.

10. Using MP3

- This service is provided to the customers who have integration membership cards of SK Telecom sites (e-station, TTLPlayOn, ting, CARA, UTO, 011010leadersclub). The members of 'http://www.nate.com' can not use this service. In order to transfer to a MP3 phone, you have to be authorized by entering the information of the relevant phone.
- The addition call charge is not imposed for downloading music. However, the information service fee by numbers of download is imposed.
- A call is not connected while downloading MP3 files.

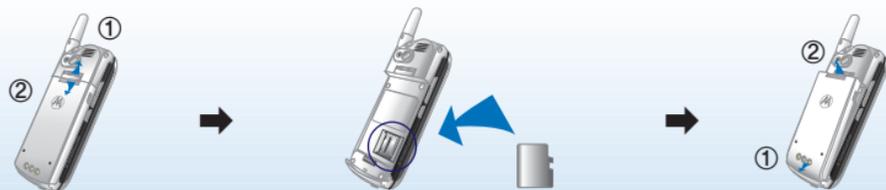

3. Playing MP3 files

- You can check the MP3 files downloaded via the phone from 'My Album' in the MOD menu of the phone. (See P47~P48 for using My Album)
- You can adjust the ring volume by pressing  while playing MP3 files.
- You can only play the MP3 files with the extension name of 'dcf'.

11. Using Trans flash

You can store the downloaded MP3 files to Trans flash. The Trans flash is an unbundled product and Motorola does not distribute the Trans flash. You can purchase the Trans flash from Soi electronics Inc. (www.soi.co.kr) that is the official importer of San Disk Inc. in U.S.A. For the purchase, contact with Soi Electronics Inc.

1. Mounting Trans flash on the phone

Separating the battery from the phone Inserting the Trans flash to the back of the phone and combining the phone and the battery.

※ Power off the phone before separating the battery. (If you separating the battery by force, it can be resulted in a trouble.)

2. Downloading MP3 files to the Trans flash

1. After joining the service in '<http://www.melon.com>' and download/install the 'Melon Player' program in your PC. (See page 62~P63 for using MP3)
2. Run the 'Melon Player' and select contents to download.
3. Download MP3 files by selecting 'Trans Flash' after pressing 'Transfer to Phone' in the lower right side of 'Melon Player'.

- The MP3 files downloaded to the trans flash via a phone is not played in another phone.
- You can check the MP3 files stored in the trans flash in 'My Album' of the MOD menu. (See page 47~P48 for using My Album)
- You can delete the files stored in the trans flash by means of 'Initialize' and 'Trans Flash' of 'Phone Management' or 'My Album' from the MOD menu.

11. Using Trans Flash

■ Note

- You can only use the trans flash for the phone.
- The trans flash is currently available up to 128 MB but its capacity is going to be extended in next year.
- The trans flash can only store the NP3 files with the extension name of 'dcf'.
- Do not turn off the phone or do not separate the trans flash while using the trans flash (download or play of MP3 files, initialization of the trans flash)
- Clean the contact area of the trans flash from dust or foreign materials. If the contact area is stained with foreign materials, clean with a soft cloth.
- If you purchase the trans flash or store MP3 files to the wrong folder instead of MP3 folder, the MP3 files stored in the phone may not be worked.
- If you directly connect the trans flash to a PC (connection through 'memory card reader' by means of SD adapter) without storing MP3 files by connecting it to the phone, it may be resulted in a trouble.
- The dcf files named with Korean letter are not supported in the phone.
- The trans flash has limited life, and so it cannot be available for a long time. Replace the old trans flash with new trans flash.
- Do not use the hot and humid place or the place with corrosive materials.
- Do not press, impact or bend the trans flash.
- Do not keep the trans flash in the place within the reach of kids or pets.

IV Using Menu Function

1. Changing Ringer Tone	67
2. Selecting Bell/Vib	69
3. Setting Ring Volume	71
4. Setting Group Bell	71
5. Setting Effect Tone	73
6. Setting Alarm Tone	74
7. Missed Call Alert	75

Using Menu Function IV

1. Changing Ringer Tone

You can change a ringer tone sounded when a call is received. Besides the default ringer tones stored in your cell phone, you can use the melody download service provided by your service provider to download various ringer tones.

[MENU] ▶ Select Sound Setting ▶ Select Select Ringer Tone ▶ Press  to select the kind of bells
▶ Press  to select a desired ringer

● While setting ringer tone, you can use  to set volume. (Step: 5 steps)

■ Kind of Bells

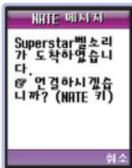

- Melody : 1~15
- Natural Sound : 1~5
- My Bell : Up to 999 (4-poly, 16-poly, 40-poly, and 64-poly melodies downloaded can be stored.)
- Single Bell : 1~10 (Single melody downloaded is stored.)
- Live Bell : Available infinitely depending on the capacity of memory.
- Bell: 1~9

1. Changing Ringer Tone

1. Melody Downloading

1. 700 Service

Enter a phone number and then press 

Press 

after you check the message.

- My bell service phone number: (060)700-5857, (060)700-5486, (060)700-5782, (060)700-5457, (060)700-5780
- If you select desired melodies according to the voice guide message to download them, and then the message downloaded through 700 service is transmitted, you are connected to NATE and download the melody.
- If a melody downloaded through 700 service is a single tone, it is registered with 'Single Bell' under 'Sound Setting' automatically. 4-poly, 16-poly, 40-poly, and 64-poly melodies are stored in 'My Bell' under 'Sound Setting'.

2. Downloading Ringer Tone from NATE

Press and hold  in the initial screen to connect to NATE ▶ Provided by service provider

- To change a downloaded melody to a received bell, select 'My Bell' or  Bellin 'Select Ringer Tone' under 'Sound Setting', and then select a desired melody from downloaded ones.
- My bell melody can be downloaded up to 999 and Live Bell can be downloaded unlimitedly according to the capacity of memory.
- To delete a downloaded 'my bell' or 'single bell', select a melody to delete from 'Select Bell' under 'Sound Setting' and then select  [DELETE]. If a melody to delete is set to basic tone, it cannot be deleted. To delete it, first, clear the basic tone. You can delete a downloaded melody from 'My Bell' under 'Contents Gallery' or 'Memory Info' under 'Phone Care'. (See page 90~91 for Using Memory Info.)

2. Selecting Bell/Vib

You can set a ringer tone when a call or message is received.

 [MENU] ▶ Select Sound Setting ▶ Select Bell/Vib ▶ Select a desired receive mode, and then press  [OK].

- Even if you change receive mode in Select Bell/Vib' under 'Sound Setting' if etiquette mode has been set, the receive mode is not changed if the etiquette mode is not cleared. In clearing the etiquette mode, the phone returns to the most recently set receive mode.

■ Bell/Vib Icons

- Bell ('' is displayed on the screen)
- Vib ('' is displayed on the screen)
- Lamp ('' is displayed on the screen)
- Vib&Bell ('' is displayed on the screen)
- Vib Then Bell ('' is displayed on the screen)
- Low to High ('' is displayed on the screen)

1. Etiquette Mode Setting

This feature allows you to change Bell or alarm mode to Vibrator or Mute mode in order not to make yourself a nuisance at a conference, in class, or in a public place. However, the earpiece is connected, even if your phone is set to etiquette mode, it makes a sound through the jack of earpiece.

- If Etiquette Mode is set, '' is displayed on the initial screen.

2. Selecting Bell/Vib

1. How to set

Press and hold in the initial screen.

- A message 'Etiquette Mode has been set' is displayed and then the phone generates vibration and moves to Initial screen.
- When Etiquette Mode is set, the vibrator is operated for alarm tone. However, for morning call, alarm is sounded.
- If you switch Off and then On your phone, your phone maintains Etiquette Mode.

2. How to release

Press and hold in the initial screen where Etiquette Mode has been set.

- A message 'Etiquette Mode has been released' is displayed and then the phone moves to Initial screen.

■ If Etiquette Mode is set

- | | |
|---|--|
| ● Ringer tone: Vibrating | ● Button tone: Muted |
| ● Alarm: Vibrating (But muted for morning call) | ● Connect tone: Muted |
| ● 1Min Timer: Muted | ● Message tone: Vibrating |
| ● Power Off: Muted (If 'Reset Alarm' is set in 'Message Tone', the lamp flashes.) (See page 195.) | ● Message Box Tone : Muted |
| ● Power On: Vibrating | ● Out of SVC area: Muted |
| ● Slide: Muted | ● Emergency SMS Tone: Emergency Bell sounded |
| ● Low Batt : Muted | ● Ready for Shutter: Muted |
| ● Shutter Tone: Sounded | |

* What is Emergency SMS ?

Emergency SMS is provided by service provider for the purpose of notifying its users of dangerous situation when an emergency situation occurs in a specific area and then escape that area safely by using a short message service.

3. Setting Ring Volume

You can set volume of receive tone, earpiece volume, keytone & slide, message, and phone theme.

- ▶ [MENU]
- ▶ Select Sound Setting
- ▶ Select Ring Volume Setting
- ▶ Select a menu to set
- ▶ Press [OK] pressing or after adjusting Ring volume.

4. Setting Group Bell

You can set graphics or ringer tones for groups respectively.

1. Graphic setting for group

- [MENU] ▶ Select Sound Setting ▶ Select Set Group Bell ▶ Select a desired group ▶ Select character icon ▶ Press to select a desired graphic, and then press [Store].

- If graphics for individuals are not set, graphic for a group is displayed. If both graphics for individuals and groups are not set, the graphic of Receive Screen selected under Display Setting ▶ Display Setting ▶ Call Received is displayed. (See page 77 for Setting Graphic.)

4. Setting Group Bell

2. Ringer tone designating for group

[MENU] ▶ Select Sound Setting ▶ Select Set Group Bell ▶ Select a desired group ▶ Select character icon
▶ Press to select a desired graphic, and then press [Store].

- If a ringer tone by individual is not set, another ringer tone set for group is sounded. And if ringer tones for individual and group both are not set, the ringer tone set in 'Select Ringer Tone' is sounded. (See page.67~68 Setting Ringer Tone.)
- Kind of Bells: Ringer Tone Reset , Ringer Tone 1~9, Melody 1~15, Natural Sound 1~5, My Bell 1~999, Single Tone 1~10, Live Bell (unlimited according to memory capacity)

The Ring volume when a call is received with the slide open is sounded louder and louder increasingly until the volume set by user at the 1st level, regardless of Ring volume set by user. Do not put your phone to your ear until receiving a call, as the Ring volume may damage your eardrum.

5. Setting Effect Tone

You can set various effect tones on your phone. If you didn't set keytone & slide volume over 1 level by using effect tone is not sounded even if it has been set. However, for shutter sound, alarm is sounded.

[MENU] ▶ Select Sound Setting ▶ Select Set Effect Tone ▶ Select a desired effect tone
▶ Select a setting and then press [DONE].

1. Power ON/OFF

You can set a tone to 'sounded' or 'mute' when turning the power ON or OFF. (tone 1~2, Clear)

- If you select 'Clear' for a setting and then turn the power ON, your cell phone produces vibration and then displays the initial screen.

2. Dialog box

You can set a tone to 'sounded' or 'mute' when popup menu is displayed in screen. (Set, Clear)

- Tones for popup menu boxes vary depending upon each situation.

3. Keypad Tone

You can set a tone to 'sounded' or 'clear' when pressing buttons on the keypad. Voice, Do Re Mi, Water drop, Electronic sound, Clear

- Pressing in the initial screen enables you to adjust keypad tone volume. (Keytone & slide tone volume : 1~5)

5. Setting Effect Tone

4. Slide

You can set or clear the tone sounded when opening or closing the slide of your phone, tone 1~5, Clear

5. Shutter Sound/Ready for Shutter:

You can set tones for shutter/ready for shutter sounded when taking a picture. (Shutter Tone: shutter tone in 1~3 levels/ready for shutter: ready tone in 1 levels, Clear)

- If Etiquette mode is set, ready for shutter tone is not sounded but shutter tone is sounded.

6. Setting Alarm Tone

You can set various alarm tones on your phone.

[MENU] ▶ Select Sound Setting ▶ Select Set Alarm Tone ▶ Select a desired alarm tone ▶ Select a setting and then press [DONE].

1. Connect Tone

This function notifies you of call connecting when you place a call.

2. 1 Min Timer

This function displays call time during a call and sounds an alert 10 seconds in advance at every 1 minute lapse from the start of call connection.

6. Setting Alarm Tone

3. Out-Of SVC Tone

You can set your cell phone so that it sounds an alert if you go beyond your own service area or are in an out-of-service area.

4. Low BAT Tone

This function sounds a tone when your phone needs recharging.

7. Missed Call Alert

This function notifies you of unanswered calls.

[MENU] ▶ Select Sound Setting ▶ Select Missed Call Alert ▶ Select a menu to set

1. Ringer Option

You can set ringer for unanswered call alert. (Once, 2Min Timer, Clear)

2. Ringer Type

You can set ringer style for unanswered call alert. (Missed Call Alert in 1~3 levels)

3. Volume

You can adjust bell volume for unanswered call alert. (Ring Volume: 1~5)

IV Using Menu Function

1. Setting Graphic	77
2. Changing Banner	78
3. Selecting Font	79
4. Backlit Time	80

1. Setting Graphic

You can change the graphic displayed in 'Normal', 'Called', 'Calling', 'Power On', 'Power Off', 'NATE', 'Screen Saver'. Graphic can be used by downloading up to 999 according to the memory capacity after NATE connection.

[Menu] ▶ Select Display Setting ▶ Select Display Setting ▶ Select a desired Screen ▶ Select a desired graphic and then press [OK].

1. Downloading Graphic

You can access NATE to download graphics up to 999 according to the memory capacity. (See page 41~ 42 for Using NATE)

Press and hold  in the initial screen to connect to NATE ▶ Provided by service provider

- You can adjust the volume by pressing while playing game.

6. Game

1. ChildMonk

■ Description of Game Menu

- NEW : A new game begins.
- LOAD : The game is automatically stored whenever you break a stage of the game, and you can import the stored game.
- KEY :
 - : Enables you to move in 4 directions.
 - : Enables you to jump left or right.
 - : Enables you to attack.
 - [Menu]: Menu is displayed.
- OPTION : You can set Speed Control.

A gamer fights against specters with the power of various items and events given at each stage;

- Red Beads(Prayer Beads): It is an item which enables you to move invincibly for a time
- Liquor bottle: Score Item
- Triangular Rice Ball It is an item strengthening power of Cham and Rod
- Wooden Gong: All specters on the internal LCD are sealed in beads at the moment you obtain the wooden gong.
- Sutra: You can obtain a sutra by one of 4 characters, 'Ban' 'Ya' 'Sim' and 'Gyoung', and a life is generated, if you collect all.

- There are total 15 stages on which ChildMonk, a hero, makes a venture. Specters who show themselves on 15 stages have different characters and defend each own stage.
- ChildMonk with charms throws a charm to seal a specter, and ChildMonk with rod tuft expelling specters thrusts a specter with the rod and then put it in a bag to be sealed.
- Each character has its own story on the different map, and there are 3 stages including the last one on which it get through the same places.
- ChildMonk must put the specified number of specters into a bag on each stage, and when ChildMonk dies, all specters in the bag unseal the bag and jump out of it.
- The more specters ChildMonk put into the bag, the more Buddhist merit (game points) are accumulated, and if the specters are unsealed or ChildMonk is attacked by the enemy, Buddhist merit may be decreased.

6. Game

2. AirHawk

■ Description of Game Menu

- NEW GAME : A new game begins.
- KEY MENU :
 - : Enables you to move in 4 directions.
 - , , , , : Enables you to attack.
 - [Menu] : Menu is displayed.
- LOAD GAME : Enables user to clear auto connect & register.
- ABOUT GAME : Menu is displayed.
- OPTION : You can set Speed Control.

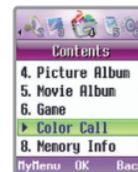

Types of Items

IV Using Menu Function

1. Language	107
2. Phone Lock	107
3. Setting External Key	111
4. Area Code	112
5. Setting Service Lamp	113
6. Initialization	114
7. Internet Setting	115
8. Stored Information	118

1. Language

You can select the language displayed on your phone. (Kind of Language: Korean, English)

[Menu] ▶ Select Phone Care ▶ Select Language ▶ Select a desired language and then press **OK** [OK].

2. Phone Lock

[MENU] ▶ [MENU] ▶ Select Phone Care ▶ Select Phone Lock and enter the Lock Code ▶ Select a setting

- The factory-set default Lock Code is '0000'. To change the password, it can be changed in 'Lock Code' menu under 'Phone Lock'.(See page 110 for Change Lock Code)

2. Phone Lock

1. Lock Privacy

Select a desired function from Phone Book, Easy Calling, Message, Photo/Camcorder, and Schedule/Memo features to lock your phone partially so that the others can't use it.

Select Lock Privacy ▶ Press to select a desired menu ▶ Press to select a setting and then press [Done].

■ Easy Calling

In Case of 'Unlock'

In Case of 'Lock'

- You can place a call easily with the number once you have ever made a call: List the phone numbers which begin with the number you want to place a call now from Outgoing list and then search the appropriate number.

2. Phone Lock

2. All Lock

It is a function to lock the entire phone so that the others can't use it.

Select All Lock ▶ Select a setting 'Yes'

1. One Touch Lock

[How to set]

Press and hold in the initial screen.

[How to release]

Press and hold on the initial screen and then enter the lock code.

- You can answer a received call, even though your phone is locked.
- Even if you turn off the phone and then turn it on, it is still in Lock mode.
- You can place a call to 112, 113, 119 or Abbreviated Dial No.1 regardless of whether your phone is locked or not. (See page 146 for Location Number Management.)
- If you unlock the phone to use it, it is a temporary measure. Therefore, the phone returns to Lock Mode after you use it. If you want to unlock the phone completely, press and hold and then enter the lock code or select a setting 'No' in All Lock menu.

2. Phone Lock

3. Call Restrict

You can set outgoing call restrict on international calls or 700/0600.

Select Call Restrict ▶ Select an item to restrict ▶ Select a setting 'Yes'

- ┌ International Calls: International calls are restricted.
- └ 700/060 : The use of phone numbers which begin with 700 and 0600 is restricted.

4. Change Lock Code

You can change your lock code required to unlock the phone or use security functions.

Select Lock Code ▶ Enter a new lock code ▶ Enter the lock code again for confirmation

2. Phone Lock

- The factory-set default Lock Code is '0000'.
- If you forget your lock code, you must visit a service center with your ID card. Do not forget the changed lock code.
- The phone manufacture is not responsible for any damages caused by outflow of your lock code.

※ See page 34 for '3. Receive Mode' in 'Phone Care' Menu.

3. Activating the external key

If the slide of the phone is closed and the screen is the power saving mode, you can activate the phone via the pre-set way.

[Menu] ▶ Select Phone Care ▶ Select external key activating ▶ Select a desired external key and then [OK].

- ┌ Menu Key : When pressing [Menu] menu by using slide close, cell phone is activated.
- ┌ Any Key : When pressing menu by using any key, cell phone is activated.
- ┌ Slide : When pressing menu by slide open, cell phone is activated.

4. Area Code

If you set the area code that you use frequently, it is automatically inserted whenever you place a call.

[Menu] ▶ Select Phone Care ▶ Select Area Code ▶ Select an area code to set and then press [OK].

- If auto area code is set, the area code is displayed when you open the slide. Pressing CLR/END or [Call] moves you to the initial screen. If you press [Call] shortly, the area code is displayed. Please enter the phone number when the area code is displayed.
- If you enter the number which begins with 0, the area code is not displayed, and only the number you entered is displayed. (Ex: cell phone number, international call number, and other area codes)
- Select 'CLR' in Area Code List to clear auto area code setting.

Registered Area Code

- ◆ Seoul(02) ◆ Gangwon-do(033) ◆ Gyeonggi-do(031) ◆ Gyeongnam(055) ◆ Gyeongbuk(054) ◆ Daegu(053)
- ◆ Baejon(042) ◆ Busan(051) ◆ Ulsan(052) ◆ Incheon(032) ◆ Jonnam(061) ◆ Jonbuk(063)
- ◆ Jeju(064) ◆ Choongnam(041) ◆ Choongbuk(043)

5. Setting Service Lamp

If the phone is in standby mode, the service status is displayed by colors and status of the service lamp.

[Menu] ▶ Select Phone Care ▶ Select Service Lamp ▶ Select a setting 'Yes'. Wait Mode (In case the service lamp is set)

	Call Status(always displayed)	통화 상태 (항상표시됨)	
Lamp Status	Light purple lamp is flashing	Light purple is flashing	No color lamp is displayed
Phone Status	Service is available	Service is not available	A call is being received
			The line is busy

Displaying Service Lamp

Service lamp

If the service is set to 'Yes', a lamp beside the navigation button is flickered.

6. Initialization

You can initialize phone functions to the default set.

[Menu] ▶ Select Phone Care ▶ Select Initialization and then enter the password ▶ Select an item to initialize ▶ Select a setting 'Yes

- Init. Function : You cannot initialize the information stored in your phone such as information on received voice & text message, downloaded graphic & melody, and stored photos while you can initialize those functions including sound setting, LCD setting etc. to the factory-set default.
 - Init. All: You can initialize the functions you have set to the factory-set default including all information stored in the phone except subscriber's number and all call time.
 - Trans Flash : You can delete all data stored in the trans flash.
 - Init. Cache: If you use NATE with your phone, temporary information is stored in cache, and if that information is wrong, you may not connect NATE. To connect NATE normally, delete all existing information stored in cache using 'Init. Cache', and read cache information from NATE..
- Your phone is automatically Off and On after you initialize its functions. If it is not rebooted automatically, press to turn the power ON. (See page 27 Power On)
 - When you select an item to initialize, you can check Help of the selected item by pressing [Help].

7. Internet Setting

Even though you are in motion, you can use functions such as Internet & all kinds of information search and sending/receiving E-mails, if you connect a notebook or PC to your phone by wireless data cable without a separate modem.

I. Voice Reception

[Menu] ▶ Select Phone Care ▶ Select Internet Setting and then enter the password ▶ Select Voice Reception ▶ Select a desired menu and then press [OK].

- Permission of Reception : Voice reception is allowed during data communication.
- Refusal of Reception: Voice reception is refused during data communication.

Using Menu Function

IV

1. Voice Memo	120
2. Changing Banner	122
3. E-Book	123
4. Capture Screen	125
5. Stopwatch	126
6. Setting My Menu	127
7. Changing Dial Type	127

※ See page 31~33 for '1. Auto Answer' of the 'Convenient Function' menu.

1. Using Voice Memo

1. Voice Record

Voice Record is a function to record voice in Standby Mode.

[Menu] ▶ Select Convenient Function ▶ Select Voice Memo ▶ Select Voice Record ▶ Press [Save].

- Up to 20 voices can be recorded. However, a single voice can be recorded for up to three minutes and up to 30 minutes for the recording time is allowed all the voices included.
- If a call is received while recording, the voices before receiving are only recorded. You can check the recorded voices in 'Voice Replay'.
- You can cancel the recording by pressing **CLIP/ES** or [cancel] while recording.
- If the memory to record is insufficient, a message 'No space to record' is displayed when you select 'Voice Record' You can record voices after deleting a recording list in 'Voice Record' (see P121 for Deleting recording lists).

1. Using Voice Memo

2. Replaying voices

You can check the recorded voices via 'Voice Record'.

[Menu] ▶ Select Convenient Function ▶ Select Voice Memo ▶ Select Voice Replay ▶ Press **OK** [▶] after selecting a list to replay in the recording lists

3. Deleting recording lists

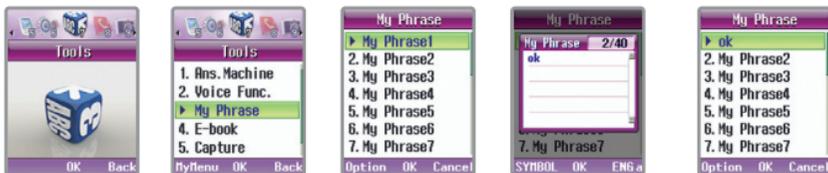

Press [Option] after selecting a list to delete in the recording lists ▶ select 'Delete' or 'Clear All' ▶ Select the configured vale 'Yes'

- Delete : Deletes only a selected recording list.
- Clear All : Deletes all recording lists stored.

2. Setting My Sentence

My Sentence is a function that imports and uses one of your favorite sentences stored up to 20 sentences (when entering a message, sending a mail and storing the title of a photo or a video).

[Menu] ▶ Select Convenient Function ▶ Select My Sentence ▶ Press [OK] after selecting a desired list ▶ Press [OK] after entering contents.

- You can enter up to 20 characters in Korean letter or 40 characters in English or symbols.
- You can check the entered My Sentence by pressing [Symbol] in a message or mail input mode.
- If you long press [CLR/TS] when contents are displayed, all contents are removed.
- To delete sentence or all sentences, select Delete/Delete All in the Delete menu after pressing [Option] in a My Sentence list to delete.

3. E-Book

[Menu] ▶ Select Convenient Function ▶ Select E-Book ▶ Select a desired file and then press [OK].

- Maximum capacity of E-Book is 16Mbyte, and up to 999 items can be stored in it. However, the stored number is subject to change depending on the file size.

1. Using Menu

Run a desired E-Book and then press [Menu].

- Go : Pressing [OK] after entering a desired page moves you there immediately.
- Search: Enter up to 49 Korean letters and 99 English letters, and then press [OK] to search.
- Changing Font: You can set font and its size displayed on the screen.
- Display Setting : You can set letter & background colors of E-Book.
- Help: The description of the keypad used for E-Book is displayed.

3. E-Book

2. Delete

- [Menu] ▶ Select Convenient Function ▶ Select E-Book ▶ Select the E-Book to delete and then press
- [Option] ▶ 'Select Delete or Clear All' ▶ Select a setting 'Yes'

4. Capture Screen

It is a function to show Capture Screen that you have stored using NATE.

- [Menu] ▶ Select Convenient Function ▶ Select Capture Screen ▶ Select Capture Screen and then check it

- Under off-line status you can check screen-captured data from NATE. Link transfer is, however, impossible.
- You can store up to 5 screen captures. But it is subject to change depending on Image or Text displayed on the screen.
- Press [Del] on the list to delete the stored capture screen.
- If you set 'Initialize Cache' in 'Initialize' of 'Cell Phone Management', all capture screens stored in the phone are removed.
- You can choose 'Save Capture Screen' in Useful Tool after pressing [menu] in web page to capture.

5. Stopwatch

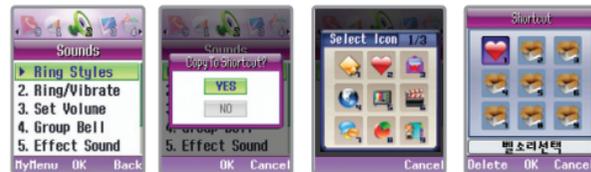

[Menu] ▶ Select Convenient Function ▶ Select Stopwatch ▶ Press **OK** [OK] to start measuring the time ▶ Press **OK** [OK] to stop it

- If you press **OK** [Continue] when the stopwatch stops, you can keep measuring the time.
- You can store up to 20 records by pressing [Record], if the record is required with the stopwatch in operation. You can check the stored records by pressing [View] on idle screen.
- All the records stored in the stopwatch are cleared and the stopwatch is ready to measure again, if you press [Restart] on the idle screen.
- The stopwatch stops, if a call is received while the stopwatch is in operation.

6. Setting My Menu

You can transfer maximum 9 menus which you use frequently to My Menu. If My Menu is displayed on the left side of bottom of the screen in searching menu features, you can copy it by pressing [My Menu] to My Menu. The menu in the existing folder is not deleted, even though you transfer it to My Menu.

Select a desired menu and then press [My Menu]

- ▶ Select a setting 'Yes'
- ▶ Select a desired icon
- ▶ Copy and transfer it to My Menu

- You cannot register SKT Service Menu and Message Menu at My Menu. If you want to delete the menus copied by My Menu, select a menu to delete and then press [Del].
- Press **CUR/TS** on the initial screen to check My Menu that you have set.

7. Changing Dial Type

You can change the dial type displayed on the screen when you enter numbers on the initial screen via the dial button.

Change the dial type by pressing **▲** or **▼** after or while entering a phone number on the initial screen.

IV Using Menu Function

1. Biz. Card Address Book	129
2. Registration of Phone Number	130
3. Correcting Phone Book	134
4. Deleting Phone Numbers	136
5. Searching Phone Numbers	138
6. Group Management	145
7. Location Number Management	146
8. Call History/Time	147
9. Number Plus	152
10. Memory Information	155
11. My Number	155

1. Biz. Card Address Book

[Menu] ▶ Select Phone Book ▶ Select Biz. Card Address Book ▶ Select a desired menu

- Biz. Card Address Book You can check the phone book by individuals stored in Phone Book.

● You must buy separately sold items at near Motorola service center or accessory shop. *For details, visit 'www.mymotorola.co.kr'.

2. Troubleshooting

- Nothing displayed on the display screen
Check the battery pack state.
- No antenna graphic displayed on the display screen
Move to other place and then attempt a call again.
- Alarms 'Toot-Toot' heard when a call is placed.
There is no communication channel available or difficulty in communication with the base station. If you press  to end the connection and then press  again, the phone will redial up.
- Charging lamp on the charger flashes in red.
Check the location of the battery pack or clean the charging terminals and then attempt a call again. If the lamp keep flashing in spite of several attempts, contact the nearest Motorola service center.
- Battery pack operating time is different from the explanation in the User's Manual.
If you charge and discharge the battery pack continuously, its operating time becomes shorter gradually. If the charged battery pack is exposed to low or high temperature, its operating time may vary.
- Malfunctions detected during using the phone or no power ON.
Remove the battery pack and reinstall it, and then turn the power ON.

4. Specification and Characteristics

Service Frequency Range	CDMA Transmit (TX) : 824.64MHz~848.37MHz Receive (RX) : 869.64MHz~893.37MHz
Frequency Stability	±300Hz
Exterior(mm)	Mounted with slim-type battery (680mAh) : 32.4 X 90 X 21.2 Mounted with Standard-Type battery (950mAh) : 32.4 X 90 X 23.2
Weight (g)	Mounted with slim-type battery(680mAh) : 90g Mounted with Standard-Type battery(950mAh) : 99g
Transmission Output	250mW
Operating Temperature	-20°C ~ +50°C
Relative Humidity	95% relative humidity for +30C

5. Specific Absorption Rate

This cell phone satisfies the Standard of Human Body Protection against Electromagnetic Wave specified on No. 2000-91 notified by Ministry of Information and Communication Republic of Korea

The phone is designed and manufactured to limit or not to exceed RF exposure level as a wireless transceiver. The limit requirement is a part of the synthetic guideline to define the permissible value of high frequency for general users. The guidelines are based on the standard developed through regular and thorough research & evaluation at a separate research institute. One of them is the practical safety limit which is to seek everybody's safety regardless of age and health condition.

The exposure standard of a cell phone has been established by the use of Specific Absorption Rate(SAR), a measuring unit. The exposure standard of a cell phone has been established by the use of Specific Absorption Rate(SAR), a measuring unit. SAR test is done; the cell phone in normal operation is tested under which transmission is done at the maximum output level authorized in all tested frequency band. SAR is set at authorized maximum output level, but real SAR level of a phone in operation is likely to be lower than the maximum level. Because the phone is designed to be operated at various output levels in order to use only output required to reach wireless base station. In general, the nearer the base station, the lower the output.

We test our products to confirm if they satisfy these requirements before sales for general users. The phones are tested at the position subject to the test method determined by professional standard institute. The maximum SAR level is 1.22 W/kg when the phone is tested under which it is placed on an user's ear.

SAR level is subject to change depending on places where each phone is used, but it satisfies our government's safety exposure requirements. SAR level of next models may vary thanks to improved functions of the phone but we hope you understand our products are designed to satisfy the above guidelines in any case.

Warranty Policy

Thank for purchasing Motorola product.
This product has passed a strict quality control and inspection. If a defect in workmanship or natural trouble is found in this product, we will offer free service to you at Motorola Service Center.

Model name		Serial No.	
Date of purchase	. . .	Customer name	
Motorola dealer		Price paid	

* Please fill up the given form on the Warranty Policy when purchasing the product and keep it together with the receipt in good condition in order to obtain more beneficial service.

Warranty Period

- Terminal equipment: 1 year
- Other accessories: 1 year
- Lithium ion battery : 6 months

Free Service

Only if any defects arise within the warranty period(1 year) from the date of purchase, we will repair the defects free of charge.

Types of defects or trouble		Coverage of warranty	
		Within the warranty period	After the warranty period
Defects in performance or functionality occurring in normal operation within 10 days from the date of purchase, which requires large repairs		Replacing of product or returning of the price paid	
Defects in performance or functionality occurring in normal operation within 1 month from the date of purchase, which requires large repairs.		Replacing of product	
Repairable	Same defect which has occurred fourth after the 3rd repair.	Replacing of product or returning of the price paid	Paid service
	Defects on various parts which have occurred 11th after the 4th repairs	Replacing of product or returning of the price paid	Paid service
Beyond repair	Replacement parts are available but defect is beyond repair(within the shelf period for them)	Replacing of product or refunding	Replacing of product after amortizing it
	Replacement parts are not available and defect is beyond repair(within the shelf period for them)	Replacing of product or refunding	Refunding of amortized value plus 10% additional due

Paid Service

- **Other cases than defects or trouble**
If you ask for any service other than for defects or trouble for your cell phone after the warranty period, such service may be charged at cost. Be sure to read the user's manual thoroughly before visiting or calling the service center.
- **Defects as a result of consumer's fault**
 - Defects as a result of careless handling(submersion or shock) or repairs improperly performed or unauthorized modification of the product
 - Defects as a result of connecting the product to improper power source
 - Defects as a result of getting the product repaired by any persons other than Motorola Service Center
 - Defects as a result of using any separately sold items which are not supplied by Motorola
 - Defects or damage due to having the product fall after setting it up
- **Other causes**
 - Defects as a result of natural disaster such as fire, earthquake, flood, etc.
 - If service life of consumable parts(battery, oscillator, flip cover, earphone, antenna, and various attachments) is ended
