

## Motorola Timeport™ 280

### *Giving You the Power to Master Time*

The Motorola Timeport 280 is one intelligent device, offering high-performance and time-maximizing functions in one sleek hand held wireless device. GSM tri-band technology and GPRS (General Packet Radio Service) packet data combine to make the Timeport 280 a formidable tool for managing your office on the go, whether networking at a local luncheon or wooing clients in Asia or Europe.

- ***WAP Just Got Better***  
WAP 1.1 enabled just got better with GPRS technology that provides constant connection to the Internet. Say goodbye to frustrating delays getting access to the net. Virtually instant and constant connectivity to world news, the weather, stock market price and current events is now quickly at your fingertips. Taking that important call is no problem – the Internet session will be put on hold and can be resumed instantly after finishing the conversation.
- ***Three is the Magic Number***  
Tri-band technology sets this phone apart from the rest. The Motorola Timeport 280 phone automatically selects either the GSM 900 or 1800 band of operation and allows the full range of features to operate in many major cities in Europe and other countries that have GSM carriers. Or the user can manually select the GSM 1900 band of operation when in the Americas.
- ***Navigating Has Never Been Easier***  
Journey through your feature-rich phone with ease. The four way “joy-stick” navigational key allows you to scroll through the phone’s comprehensive menus with a single finger. Text editing, number editing, phonebook applications and calendar updating having never been easier with Motorola’s new user interface.
- ***Do You Recognize This?***  
Keep your eyes on the road and save time with voice activated dialing and function control.\* After pre-programming voice commands into the phone, simply press the “voice activation key” on the side of the phone and speak the command. The phone will immediately dial the matched number or activate the menu shortcut.
- ***Bigger is Better***  
The Timeport 280’s large graphical display shows up to six lines of text (96 characters) and two lines of status icons. With this display, the presentation of the wireless application protocol (WAP) microbrowser is enhanced. Backlighting and excellent resolution also complement this ample display.
- **Expected Availability:** Mid-2001 in Europe, Asia and North America
