

Motorola T720

Bringing color to a classic form, the Motorola T720 deepens the love affair with flip phones as a simple and practical experience for the power professional. The large graphic display supports up to 4,096 colors on the icon-driven interface, making the Motorola T720 very easy on the eyes. The model T720 makes managing a mobile office fast and efficient, whether making calls, scheduling appointments, sending text messages and office e-mail* or downloading new applications. And no office is complete without a few games – they're perfect with the speakerphone for a little mobile merriment. All of this and more packed into a small, thin device that can be tucked almost anywhere. Smart, small and in living color – welcome to the mototron experience.

Out of Thin Air

Add additional features and applications to your phone wirelessly with J2ME™ technology that allows you to pack the Motorola T720 with the tools you need. Want to add a financial calculator, memo pad, perhaps a Reuters news feed, or a game to pass time? It's easy and fun with the Motorola T720. No two will ever look alike.

Color-conscious?

The Motorola T720 sports a large, graphic screen that supports up to 4,096 colors – perfect for the busy professional looking for the perfect blend of color and style. View up to nine lines on the display or zoom in to see seven, and use the enhanced user interface with animated icons, quick-access keys and 4-way navigation key for instantaneous information.

Control Your Connection*

The new Motorola T720 is powered with GPRS technology, which means fast connections and data speeds. Access e-mail on the go with the included POP3 e-mail client, and send messages to any mobile or e-mail address. Multi-task in overdrive with the ability to switch from checking e-mail to receiving a call to browsing the Web to sending a fax – without waiting to dial-up.

To Each Their Own

With the Motorola T720, you can change the front and back covers, change your display with new “wallpaper,” or download new ring tones to create a look that is unique for you. You can also up to 32 ring tones or compose your own – all will sound harmonious with the Motorola T720's audio-rich speaker.

Tell Me More*

SMS as you know it is evolving to EMS 5.0 (Enhanced Messaging Service), letting users add musical tunes, colorful animated icons and screensavers to messages. Get the message across in more ways than one. Use voice activated dialing to easily make a call and the VibraCall alert if you need to be discreet.

Whim for PIM?*

The Motorola T720 supports TrueSync® software that enables users to create, edit and synchronize the 500-entry phonebook with their compatible PC, Web-based PIMs and other handheld devices.

Gimme a Break!

With the Motorola T720, you are going to need something to do with all the time it saves you. So attach the MP3 Player optional accessory and wind down to your favorite tunes downloaded from the Net or personal CD collection. The FM Stereo Radio Headset optional accessory allows you listen to your favorite radio or talk station while in between meetings, or use it as a hands-free device when you are on the move.

* Network and subscription dependent feature. Not available in all areas.

** Designed to synchronize with basic features of the initial release of many popular Personal Information Management (PIM) software and hardware products.
