

Technical Bulletin

Bulletin No: 1004
Issue Date: 05/06/2003
Product: GX10 / GX10i

Data Back from GX10 to GX10i

The GX10i memory map differs from the memory map implemented in the GX10.

For this reason, a back up and restore of customer data from a GX10 to a GX10i must not be performed.

Sharp will not be held responsible for any problems relating to the non-compliance of this instruction.
