Custom firmware with ported and expanded ElfPack v1.0 with stock and original content for Motorola SLVR L2, SLVR L6, SLVR L6i, SLVR L6g, and similar phones. The ELF library was seriously updated and new ELF's were ported and added.

The firmware is prepared on the R3443H1 platform and is suitable for many phones like L2, L6, L6i, L6g, V19x, and some others on Neptune LTE SoC with a screen resolution of 128x160 cSTN and 8 MiB RAM. This platform has an auto-keypad lock. Separately, there is DRM with original new icons.

S/W: **R3443H1_G_0A.65.0BR**

Flex: **SE5411AXXU10AB**

Installation:

01. Charge the battery.
02. Enter Boot Loader mode by simultaneously pressing *****, **#**, **Red key** when the phone is turned off.
03. Install Motorola USB Driver v3.7.0: [32-bit](#) | [64-bit](#).
04. Connect the phone to the PC.
05. Flash the SBF firmware file using [RSD Lite 3.8](#), you can flash it from under a virtual machine, see for more details the topic: [Virtual machine images for Motorola, WinXP and Win2K phones for VirtualBox and VMware Player](#).
06. Additionally, you can flash the SBF firmware file of the updated graphics DRM package.

Changes:

01. CG1, CG7, CG18: RSA bypassed.
02. CG1: Changed Boot Screen.
03. CG1: All ELF patches have been added.
04. CG2, CG4: MotoMixer menu item was activated and renamed to ELF's.
05. CG2: FEM activated.
06. CG2: JAL activated.
07. CG2: *#9999#
08. CG2: Opcode Hand-Test-Command (Menu + 048263*) activated.
09. CG2: Added ELF's.
10. CG15: Timings in DRM/CG15 have been reduced.
11. CG2: Added various stock content.
12. CG1: Added the ability to remove SIM-Lock.
13. CG2: Funlight/Club Lights activated.
14. CG2: Increased volume in **gain_table.bin** and **param_table.bin** files, fixed file attributes.
15. CG1: MP3 bitrate limit increased to 320 kbps.
16. CG1: Removed message about "Invalid battery".
17. CG1: Added Java patches for access and signature bypass.
18. CG4: Fixed Cyrillic bold font in the Web browser.
19. CG4: Fixed ID3 tags in MP3 in Win-1251 encoding.

List of Patches:**Код**

```
R3443H1_65.0BR_Airplane_Mode.fpa
R3443H1_65.0BR_Canvas_All_Keys.fpa
R3443H1_65.0BR_Canvas_Longkey_Timer.fpa
R3443H1_65.0BR_ElfDirectory.fpa
R3443H1_65.0BR_ElfPack_v1.0.fpa
R3443H1_65.0BR_IncreaseHeap_1400KB.fpa
R3443H1_65.0BR_Invalid_Battery_Fix.fpa
R3443H1_65.0BR_itoa.fpa
R3443H1_65.0BR_Java_Drop_Signature_Checks.fpa
R3443H1_65.0BR_Java_Unlock_File_System.fpa
R3443H1_65.0BR_Java_Unlock_System_Files.fpa
R3443H1_65.0BR_MP3_320_kbps.fpa
R3443H1_65.0BR_Register_ElfPack_v1.0.fpa
R3443H1_65.0BR_Write_Locked_PDS.fpa
```

List of ELF's:**Код**

```
2048-P2K
Backuper
BadApple
Benchmark
Block
Dumper
ElfBox
FBrowser

```

A description of some ELF's can be found in the [ELF's by EXL: Nostalgia of development](#)

[modded]: L6i_R3443H1_G_0A.65.0BR + ELF's - MotoFan.Ru — всё для Motorola
for Motorola P2K.

Attention! Some ELF applications require a running and minimized any Java application.

Task List:

01. CG1: Switch to the next track in audio player and video player.
02. CG1: Activate charging on "Invalid battery".
03. CG1: Port TFPG tasks.

Thanks:

01. **-=Smart=-**: for the idea of creating firmware with original content.
02. **Andy51**: for ElfPack v1.0 and PortKit!
03. **baat**: for testing on Motorola SLVR L6.
04. **Nordmind**: for testing on Motorola SLVR L6i.
